Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

ADMMR SNYDER HILL LIMESTONE FILE

SNYDER HILL LIMESTONE

PIMA COUNTY

MG WR 4/25/86: The Snyder Hill property (Sections 3 & 4, T15S R12E, Amole mining district, Pima County) has until recently been held by Moki Minerals. Moki apparently allowed the claims to lapse and Mr. John Faick (c) and his associates have reportedly re-located the ground. Mr. Faick is apparently interested in the property as a source of limestone.

MG WR 5/2/86: Mr. John Faick (c) has notified me that he and two associates have staked the Avra group of three lode claims and the Lucky 1 association placer claim of 60 acres on Snyder Hill. The lcoation date was February 11, 1986.

Tucson, Arizona,
July, 15,
19 47.

Mr. Chas. H. Dunning,
304 Arizona Title Bldg.,
Phoenix, Arizona.

Dear Mr. Dunning:

Do not know as to whether your office has a list of available mining claims, in the state, if so will you kindly add mine to same? Have a limestone claim, more specifically described as follows:

The Snyder Hill Limestone deposit is located about ten miles from Tucson, Arizona, over a paved highway and is situated directly on the Tucson-Ajo Highway. The Ajo Sonoyta Road to Rocky Point on the Gulf of California, is a continuation of this road.

The deposit consists of three unpatented placer claims, of Twenty acres each. The hill is about One mile long and contains a million ton more or less of limestone the limestone assays as follows:

Carbonate of Lime (Ca CO ₃)	89.28
Insoluble (Si O ₂)	7.04
	<u>96.32</u>

The crushed lime weighs Ninety Six Pounds per cubic foot. Beside using the lime stone for lime or cement purposes, it has other possibilities, there is a market here for crushed rock, as we have only one rock quarry, in town.

In conjunction with the placer claim we also hold a Millsite claim containing about Five acres This claims has a well on it about Two Hundred and Sixteen feet deep.

Would consider selling same or leasing to reliable parties.

Yours very truly,

F. O. Christmann
P.O. Box 1772.

Pima

Mr. F. O. Christmann
P. O. Box 1772
Tucson, Arizona

Dear Mr. Christmann:

This department does have files on mining properties and we are continually trying to keep them up and sort them over.

We note what you say about your lime property and will be glad to keep it on file and in mind.

Yours very truly,

Chas. H. Dunning
Director
