## **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

## **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

## **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Date..... March 15, 1957.....

TO: Mr. D. M. Kentro  
Assistant Vice-President

SUBJECT: John B. Eckel Property,  
Campwood, Arizona

On March 9th I visited the John B. Eckel property near Campwood, Arizona. I was accompanied on this examination by Mr. Robert Passmore, a friend of Mr. Eckels.

*file*  
This property is situated in the Campwood, Arizona District and the copper showings are located approximately in the center of the unpatented Stringtown #1 claim. This claim is located one and one-half miles northeast of the Campwood postoffice. Mr. Eckels has five unpatented claims in this <sup>area</sup>.

A quartz dike outcrops for approximately 100 feet and is bounded on the hanging wall by a micaceous schist and on the footwall by a granite. A couple of cuts were mined, starting at the water level and extending to the quartz dike. A cut alongside the quartz dike was also mined. Very little mineralization shows and only a very few of the rocks on the dump show any copper staining. This outcrop has all the appearances of a blow-out and in my opinion not worthy of any interest to the company.
