Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Fowler St

(AVONDALE SE)
3550 IV SE

Mapped by the Army Map Service
Published for civil use by the Geological Survey

Control by USGS, USC&GS and USCE
Topography from aerial photographs by photogrammetric methods
Aerial photographs taken 1951. Field checked 1951-52
Polyconic projection. 1927 North American datum
10,000-foot grid based on Arizona coordinate system, central zone
1000-meter Universal Transverse Mercator grid ticks,
zone 12, shown in blue

Red tint indicates area in which only landmark buildings are shown
Revisions shown in purple compiled by the Geological Survey from
aerial photographs taken 1967 and 1973. This information not for the best
Purple tint indicates extension of urban areas.

GRID AND 1973 MAGNETIC NORTH
DECLINATION AT CENTER OF SHEET

SUN MATERIALS

MARICOPA COUNTY

KAP WR 8/1/86: Met with Dub White at Sun Materials sand and gravel operation at 79th Avenue and the Salt River, Salt River District, Maricopa County. There I assisted him in setting up a pilot sluice box to treat the washing plant's slurry discharge. This is part of a test Mr. White is making to determine if any gold can be recovered from sand and gravel operations on the lower Salt River. Three trips were made to the operation during the week to check on progress.

KAP WR 10/3/86: Fred Mendenberg, Chief Geologist, Edw. C. Levy Company, 9300 Dix Avenue, Dearborn, Michigan 48120, phone (313) 843-7200 explained he is evaluating the Sun Materials aggregate mine at 79th Avenue and the Salt River Maricopa County for possible acquisition. The gold recovery test in which the Arizona Department of Mines & Mineral Resources assisted was explained. No gold was recovered.

SERVICES AND HELP

FROM THE

ARIZONA DEPARTMENT OF MINES AND MINERAL RESOURCES

The Arizona Department of Mines and Mineral Resources is many different things to different people. We are a service agency and neither regulate, tax, nor require any registration.

The overall objective of the Arizona Department of Mines and Mineral Resources is to aid in the promotion and development of Arizona's mineral resources and mineral related industries.

The clientele of the Arizona Department of Mines and Mineral Resources is indeed varied. Thus the agency provides many different services tailored to meet the differing needs of the public.

For the PUBLIC we:

1. Publish a number of Special Reports, Directories, Circulars, Mineral Reports, handouts and examples such as: Laws and Regulations Governing Mineral Rights in Arizona; Directory of Exploration and Mineral Development in Arizona; Molybdenum Occurrences in Arizona; The Primary Copper Industry of Arizona; Prospecting for Barite and many more. (see our list of available publications)
2. Hold conferences and seminars on many subjects including mining claim staking, processing gold ore, prospecting methods, mineral identification, beryl, placer deposits and much more. Conferences and seminars are held throughout the state.
3. Are a mining and mineral information bureau.
4. Are a source of technical expertise to answer questions, identify samples, provide public speakers and publish data.
5. Maintain the ARIZONA MINERAL MUSEUM which:
 - a. Displays and preserves one of the largest and finest mineral collections in the West.
 - b. Identifies minerals for the public.
 - c. Publishes collecting trip maps and directories of clubs and shows.
 - d. Provides loan displays for public institutions.
