Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

STATE OF ARIZONA

FIELD ENGINEERS REPORT

Mine Talley-Barnett Claims

Date February 16, 1960

District Pioneer Dist., Pinal Co.

Engineer Lewis A. Smith

Subject: Interview with Walter C. Smith of Coolidge.

Location: West of the Adams Pit (about $1\frac{1}{2}$ miles), NW base of Pickett Post Mtn.

Property: 18 claims

Owners: M. E. Talley and J. W. Barnett, Hayden, Arizona. (conf.) (Reported to be negotiating for lease to American Natural Resources Corp., 280 Madison St., New York City, N.Y.)

Mineral: Perlite

Character: "Onion" perlite similar to that in the Sil Flo property (Adams Mine) which lies in the top of a rhyolite flow which in turn underlies the dacite flows. In places on the upper portion of the deposit a darker perlite of different character is found next to the dacite.

Work: The work is reported to have been confined to one open pit and some short drilling. $1/2$ to $3/4$ mile of road would have to be constructed to make the property accessible.
