Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

DEPARTMENT OF MINERAL RESOURCES

STATE OF ARIZONA
FIELD ENGINEERS REPORT

Mine THOMASON PLACERS (gold) Date November 2, 1961
District MARTINEZ, YAVAPAI COUNTY Engineer Travis P. Lane
Subject: Visits of June 13, and July 12, 1961

The property comprises a large group of unpatented placer claims located along the benches on the west side of Weaver Creek about 2 miles westerly from the Octave Mine. The group of claims is owned by Geo. Thomason and members of his family.

June 13 - Visited the property and was told by Mr. Thomason that his ground was leased to Western Gold and Uranium Company and that they had recently completed an investigation of the ground. Testing consisted of pitting and trenching, using a power shovel and dozer, also dry and wet washers. The Company also tested some of their own recent locations (6 placer claims) adjoining the Thomason ground. The crew had completed the investigation and had left - to evaluate the property according to Mr. Thomason.

July 12 - Visited the Thomason camp but no one was present. The Western Gold & Uranium equipment has mostly been moved out. However, a geologist and assistant are still studying the situation for the company.

Sept. 13 - On a visit to the Orphan Mine of Western Gold and Uranium Co. at Grand Canyon, Max Cofford, geologist advised that the Thomason Weaver Creek placers were still under study with a geologist spending part time in the area.
