ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

GENERAL INFORMATION: 9/1943

A number of fissure veins offset by many closely spaced faults carry lead, zinc, gold, silver & copper in very small lenses & stringers. Occurrence of minerals at depth is neither wide enough or continuous enough to make mill grade ore. A vertical shaft reported 250' deep with levels at 140 & 250' is main development. The 140' is accessible. Open stops indicate considerable tonnage from shallow workings, 50' depth in places.

[REDACTED]

CHARACTER OF ORE:

Sulphides & oxidized ores of lead, zinc & copper carrying gold & silver.

EQUIPMENT: 9/1943

No list. Probably no equipment.
