Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

CJH WR 1/27/84: Ray Dugdale, Account Manager, Tucson Bearing Co. visited. He is also a partner with James F. Vaughn (c) in International Mining Corp. (c) Mr. Dugdale is promoting a diatomite deposit 13 miles south of Safford on the NE side of the Whitlock Mountains, Graham County. The deposit is allegedly 250' thick. Its lateral extent is unknown but the property under consideration is 2500 acres under the control of one family. Samples brought in appeared to be low in impurities with a white to slightly grey color. Helped him in market determination and where to send samples for analysis (Tuscaloosa, Ala. Bur. of Mines).

Memo from John H. Jett, November 29, 1976

*Probably
(Haralson)* Telephone call from a Mr. Bob Mills with a marketing firm in Scottsdale, Whittlock Mines, Inc., has leased the ~~Haroldson~~ property near Safford. They subleased the U₃O₈ to Anaconda. They will start sample production of a diatomaceous earth property (3200 acres) in 30 days; full production in 90 days. 10-20,000 TPY. Expects good overseas market. Also have a pumice property near Wickenburg.

Mailing address is Box 4133, Scottsdale, 85258.

REFERENCE SHEET

U.S. LIME & MINING CORP.

see Whittlock Mines, Inc. (file)

U.S. LIME & MINING CO.

Metals Corporation of America

E. Alfred Haralson, President, 105 Highway East, Safford 85546 - (428-1852)

Have been staking around Copper Creek Arizona and probably east of Jackson Mountain.

As near as I can find out, the U.S. Lime & Mining has been taken over by The Yates Petroleum Co. of Artesia. As to whether they will operate as U.S. Lime & Mining or Yates Petroleum Co. has not been decided. They still hold A. H. Haralson Jr.'s diatomaceous earth property southeast of Safford. See map of diatomaceous earth and chabazite properties north of Bowie in Graham County.

GWI 2-9-68

Metals Corporation of America appears to have taken the place of the U.S. Lime & Mining with offices in the same building. They are interested in the diatomaceous earth southeast of Safford. GWI QR 4-1968

Metals Corporation of America has apparently taken over the U.S. Lime & Mining Co., with offices in the same building. Mike Riebold is Chairman of the Board, E. Alfred Haralson, President. At present they are working on diatomaceous earth southeast of Safford. They were talking of putting in complete assay facilities. GWI QR 6-1968

Three companies, Union Carbide, Grace Chemical Corp., and Western Industrial Minerals have been doing their assessment work on their chabazite deposits in T11S, R28, 29E, all just north of the County line. Western Minerals is supposed to have obtained their claims from Norton Abrasives for \$5 the indication being that this is a subsidiary of Norton Abrasives. In T8S, R28E, Mr. Al Haralson has option 6 sections of diatomaceous earth claims to Metals Corp. of America. GWI QR 12-1968

George Bott said that Mike Reibold is back in the Aravaipa district with money to pay off past debts and assume ownership or control of the mining properties he previously held and also to acquire new ones. He is reported to have acquired certain of the Faulkner properties near Safford for \$100 cash. GWI WR 8/28/73

Field interview with Al Haralson, Safford, who says that he completed the assessment work on his diatomaceous earth claim near the 111 Ranch, S34 T8S R28E, southeast of Safford. He also says that PD & Amax have staked around his claims. GWI WR 10/22/73

U.S. LIME & MINING CO.
Box 231
Silver City, New Mexico

Officers of company are:

Mike Ribold, Chairman of the Board
Fred Ribold, Vice President
Ralph Bauer, Geologist - Member of the Board
Johnson, Geologist

FTJ WR 2-18-66

The U.S. Lime & Mining Co. of Silver City, New Mexico, have taken up several sections in the Sierra Bonita Ranch Quadrangle. It is reported that they have taken up claims in most of sections 15, 16, T8S, R22E. They are supposed to be doing geophysical work and drilling. The map shows a President Mine in Sec. 22, near there, but have found nothing in the file regarding this. GWI Note 2-7-66

Mr. E. A. (A1) Haralson, mgr. of the U.S. Lime & Mining Co. GWI WR 10-1-67

Corporation Commission says that the Statutory Agent is C. T. Corp. System, 14 N. 18th Avenue, Phoenix, Arizona - Name incorporated under is - United States Lime & Mining Corp. (out of Texas) No officers listed. Closed down because of bad check. 12-20-67
