## **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

## **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

## **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

NOTE DATE OUT OF SEQUENCE

KAP WR 9/29/80: While assisting Wes Pierce of Arizona Bureau of Geology and Mineral Technology in determining the disposition of cinders mined from various properties in the Flagstaff area, it was learned that the Arizona Block Mfg of Phoenix purchased their cinders from Flagstaff Cinder Sales.

---

RRB WR 8/16/85: Visited Flagstaff Cinder Sales, Inc., (f) five miles NE of Flagstaff (MILS 138) and talked briefly with Ron Olivier, Manager. Mr. Olivier reports that business is good and he was busy getting caught up so he could take the whole crew to Lake Powell for a long weekend this Friday.

---

Active Mine List - October 1972 - Empl. 2

---

Finally found the Baker Pit which is mined by Flagstaff Cinder Sales Inc. It is a small operation. Bob Olivier is manager, 4440 Nyla Drive, Flagstaff. FTJ WR 8/16/72

5/25/77

May 23, 1977

*Flagstaff  
Tender  
Sales  
Active  
(Baker Pit)*

Stopped at Flagstaff Cinder Sales Co. Have added delivery trucks to their fleet. Presently installing a bagging plant. Too busy to continue experimental work in nurseries and cattle feeding lots. Having problems with Forest Service. Will be going to court in San Francisco. Their property formerly belonged to a Mr. Baker (Baker Pit). Forest Service claims that when claims were originally staked in 1952 (?), more claims were located than a normal prudent man would try to work. Therefore some of the claims are now invalid. Their attorney is a Mr. Bob Kruse, Luhr Building, Phoenix.

RRB WR 10/30/81: Visited Flagstaff Cinder Sales, Inc., 5 miles NE of Flagstaff on old Highway 66. Talked to Ron Olivier, Manager. He reports that business is slow because of the slump in the building trades. They may have to lay off half the crew if business doesn't improve soon.

**DEPARTMENT OF MINERAL RESOURCES**  
STATE OF ARIZONA  
**FIELD ENGINEERS REPORT**

Mine Flagstaff Cinder Sales

Date April 19, 1976

District

Engineer John H. Jett, Director

Subject:

On February 14, I met with Mr. Bob Olivier of Flagstaff Cinder Sales. Previous discussion disclosed that he was doing experimental work on the use of their cinders in the nursery business, cattle feeding lots, soil lighteners, etc.

A Mr. Robert G. Smith of Deerfield Beach, Florida, telephoned the office looking for a source of cinders for experimental work along the same lines of effort. (Florida is one of the larger cattle feeding states).

After discussion of possibilities, Mr. Olivier is going to have his brother contact Mr. Smith.

Mr. Olivier noted that business has picked up considerably in the last 2-3 months. He is now hauling into Albuquerque and Barstow, California. Quite often he brings crushed stone from Barstow back to Flagstaff for resale. He recently sold a shipment to Arkansas. The company sent their own truck to pick up the material.

Other cinder supplies on BLM land, possibility of water freight from California and trucking to Florida were all discussed.

Mr. Olivier questioned me about the stone maps to the Lost Dutchman mine. He claims they were donated to the Mineral Museum and wants them on display there. I told him that to the best of my knowledge, the Flagg Foundation claimed ownership and presently had them in their possession. (This was at our previous meeting).

Mr. Olivier stated he had checked records of the company that donated the maps and they were donated to the Museum and some people would be called on it.

**FIELD ENGINEERS REPORT**

Mine Flagstaff Cinder Sales Inc.

Date December 19, 1975

District

Engineer John H. Jett, Director

Subject:

Information from Mr. Bob Ollivier.

Producing six different products, including two colors of some; aggregate industry and ornamental use are largest consumers. Research projects being carried on for high-strength concrete (eliminates slipping action of cement on smooth stones), as a base in feed lots to eliminate mud, and mixed with fertilizer and used as base for tree farm.

Mr. Ollivier asked if the Stone maps were still on display. I explained to him the status of the maps and he was very upset. He stated they were given to the Mineral Museum and no one else. If they had wanted someone to make money with them, his company would have kept the maps.
