Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

MILS 75A

MG WR 9/11/81: Ms. Liann Turner, Geologist, Sunchief Mines was in to discuss her company's mining properties. She reports there are three adits and three levels on the Yo Tambien property. The upper two levels are connected by a vertical shaft collared on the surface. It is not known if these levels are connected to the lowest level. Mineralization is in quartz veins and stringers in the Shultz granite. Metals include Cu, Mo, Au, and Ag. The company mined out the main vein on the two upper levels and shipped about 500 tons to their mill.

NJN WR 5/3/85: Jim Beyer (c) reports the gravity mill of the Sunchief Mines Co Mill (c) at Globe, Gila Co. is still intact, however, the flotation mill there was never finished. It seems logical to conclude then that the stockpile of molybdenum ore from Yo Tambien (c) property Gila Co. has not been run and still sits in the mill's yard.
