### **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

### **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

### **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

RECONSTRUCTION FINANCE CORPORATION  
MINING SECTION  
REPORT OF SUPERVISING ENGINEER  
\*\*\*\*\*

Docket No: Flx. No. B-562  
Date of Report: April 15, 1947

1. NAME AND ADDRESS OF APPLICANT:

Frank E. Moore  
1200 - 11th Street  
Douglas, Arizona

Correspondent: Same

2. CHARACTER OF PROJECT:

To rehabilitate shaft and underground workings of Applicant's lead mine.

3. LOCATION OF MINE:

In Sections 12 and 13, T. 20 S., R. 27 E., Swisshelm Mining District, Cochise County, Arizona. The nearest railroad station is Douglas, Arizona, approximately 50 miles by paved and graded county roads. Mine is accessible by road at all times.

4. APPLICANT:

Applicant is a cattleman and the son of an outstanding cattleman from Cochise County. Applicant's mining experience consists of operating small scale prospects. He intends to use the services of R. L. Brown, an operator who has successfully repaid two loans from the Reconstruction Finance Corporation. It is believed that the applicant will be competent to run the proposed project.

5. LOAN REQUESTED:

\$5000.00.

6. DESCRIPTION OF PROJECT:

Applicant has a lease on two unpatented mining claims that runs for a period of five years beginning March 10, 1947. He is also given the option to purchase all the right, title and interest of the lessors for \$18,000.00 within the said five years. The lessee is obligated to pay 15% on all ores up to \$30.00 per ton, and 25% on all ores over \$30.00 per ton on the net amount of the smelter returns with proper deductions for freight and hauling from mine to smelter. The royalty payments are to be credited on the purchase price.

The Applicant's property adjoins the Scribner Mine which recently repaid a loan under the operation of R. L. Brown (Docket No. ND-8747). I visited this shaft once when I made an examination of the Scribner

*"no name mine"*

property for a loan to James H. Macia (Docket No. ND-5384) on March 23, 1943. I remember the shaft and that there was a pile of siliceous lead ore on the dump from which I collected a specimen, now in my collection.

The geology of the Applicant's property is the same as for the Scribner which I have described previously

The facts, as a basis for consideration of a loan, are not many, but what there are warrant consideration. Its close proximity to the Scribner Mine and the fact that ore has been encountered and some shipped will be the basis for my recommendation.

I have collected all the mineral statistics on the Scribner since its reopening in 1940 up to the time R. L. Brown repaid his loan in March, 1947. The figures show that approximately 11,940 tons of ore have been mined that had a gross metal content of 972 ounces gold, 54,967 ounces silver and 3,424,024 pounds of lead. In addition the Chance Mining Company commenced shipping ore from their property, adjacent to the Scribner, in 1946. I have visited their operation a couple of times. They have been shipping continuously.

Larger operations are in the making for the Scribner as R. L. Brown has turned over his lease to C. F. Coraelius of El Paso, Texas, former operator of Krome, Inc. Oregon. Coraelius took the property over as a result of a recommendation by Marden W. Hayward, Consulting Engineer for American Metal. He is sinking a new shaft.

I believe that the applicant, with the proposed loan, will reveal ore of a similar grade as that mined by the Scribner and Chance which grade averages about .05 ounces gold, 4.0 ounces silver and 13 percent lead. The applicant's property lies in a direct continuation of the ore zone revealed in the Scribner, and because of this fact and the urgent need for lead I recommend that the applicant be given consideration for his request for a \$5000.00 loan.
