The following file is part of the Edwin Noel Pennebaker Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Re: Estate of John Olen Willauer, Deceased

Dear Mr. Pennebaker:

Confirming our telephone conversation of the other day, I will anticipate hearing from you about April 20th regarding the examination of mining claims for the purpose of appraisal in the Estate of J. O. Willauer.

I will collect all the information available and have same ready, together with someone who is familiar with the property so that your analysis can be made as quickly as possible.

I have heard so much about you from legal associates of mine who are more closely connected with the copper industry than I am, that I am looking forward very much to the pleasure of meeting you.

Yours truly,

James J. Cox Jr.

of COX & HEDBERG

BINGHAMTON NOTES

8/14/64 - United Comstock said to have obtained 0.8 to 1.5% cu for 500-600 ft. across select beds.

The Nipissing Mining Co. which is Canadian capital had an option on Binghampton - Copper Queen in 1956 and during 3 or 4 months in 1956 the properties were diamond drilled.

Mark Gemmell said (4/20/56)

"Since the Squire report was written (1926) probably all ore reserves shown have been mined out. Exploration work done in the late 30s consisting mainly of underground drilling failed to find new ore. Property abandoned in 1930 and later sold for taxes. Acquired by present owner in 1943 who mined and shipped all remaining low-grade carbonate ore."

Shattuck Denn has a lease on the property in the 50s

Dept of Resources memo in 1942 says - "It looks as if all exposed ore has been worked out.

COPPER QUEEN NOTES

Three tailings samples alleged to go over 1% Cu. Said to be 150,000 tons
Frank Knight says 1% tails undoubtedly

Report by A. B. Rowbotham, E.M.
