

EXPLANATION

- * Drill holes - Channel deposit 125 ft. See letter by Norman C. Stines and map by John M. Nicol.
- See report by H. H. Mc Neer.
- See report by George M. Colvocoresses.
- * This area sampled by J. J. Haeckel, Norman Stines, Kenward Engineering Co. and others. There have been many shafts sunk for sampling from ten to fifty feet deep, and it is well proven that the values run \$1.50 or more per cubic yard not taking into consideration any nuggets. See report by E. H. Kennard.
- This sampling done by Arthur H. Young, G. W. Thomson and others. Values run from one to three fifty per yard.
- It is reported by H. H. Ray's estimate that the values in this area, after spending several weeks with men sampling, were \$17,000,000.
- See report by E. Lionel c de la Pole.

SAMPLES FROM REPORT OF H. H. Mc NEER
