The following file is part of the Grover Heinrichs Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Infl	Copper precip sample	C			85.23	3.54	① net wet weight		31.81
liners, Mch.					Cu	Fe	② wash with alcohol, save solution		H ₂ O
							③ wash with acetone, save solution		
Eases.							④ air dry total sample		
t to Hoover							⑤ weigh total sample for wet dry		
icks							⑥ assay for Fe		
etc							⑦ assay for Cu		
							⑧ assay for acid soluble, Pirna method. Report method used.

Date due out _____

SPEED MEMO

To H. Lanier

At Tucson, Arizona

Subject Gibson Mine Precip.

Date May 30, 1970

Analysis of sample furnished by Paul Kayser in a qt. Mason jar.

Procedure of sample was to determine:

1. Net wet weight
2. Wash with alcohol, save solution
3. Wash with acetone, save solution
4. Air dry total sample
5. Weigh total sample for net dry
6. Assay for Fe
7. Assay for Cu
8. Assay for acid soluble, Pima method. Report method used.

~~PLEASE REPLY TO~~ 

Signed

At

Results incomplete, but assays 85.23 Cu and 3.54 Fe. Item 8 yet to be determined. Results should be forthcoming by Monday, June 1.

Attached: Dixie Basin Project results. Note the high iron and high lime which confirms the preliminary test results of Clyde Osborne.
