### **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

### **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

### **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Affidavits of Labor Performed and Improvements Made  
with some Quitclaim Deeds for the various claim groups

## Introduction

At the request of Mr. Alva Simpson, Jr., Heinrichs GEOEXploration Company conducted a property evaluation study of seven different claim groups all reported belonging to J.E. Fuller Resources Company of Tucson, Arizona. The seven groups are designated as follows:

1. J.N. Claims, Santa Cruz County, Arizona
2. Old Timer Claims, Santa Cruz County, Arizona
3. Los Jarillas Claims, Santa Cruz County, Arizona
4. S.O.B. Claims, Pinal County, Arizona
5. Monarch Claims, Pima County, Arizona
6. Lucky Strike Claims, Mohave County, Arizona
7. Queens Crown Claims, Catron County, New Mexico.

The field work was done by Donald Cooley with Dennis Fischer, Jr. as assistant, both being geologists. The office work was done by William Rasmussen, assisted by the Tucson Geoex staff. Work was done during the interim February - March, 1970.

The organization of the report is given in the index but is essentially a duplication of the following cycle for each of the seven claim groups. There is a list of legal papers on hand at Fuller Resources Office followed by a field description of the claim area and then a map showing their location. Color photos of the various areas are contained in the appendix. One set of the various U.S.G.S. topographic maps used is enclosed under separate cover.

Specific names or numbers of the various claims within a given claim group may be found on location maps which should be in your possession. In the event these are not on hand, they can be obtained from the Fuller Resources office in Tucson.

## General Field Procedure

Field procedure was to locate the area of claims in the field and identify as many claim corners as was necessary to satisfy us that the claims are probably present as represented on the claim plats. Any discrepancies, overstaking or conflicting claims found in this examination have been noted.

During the course of investigation of the claim status, the geology was briefly examined as to whether the claims have any mineral value. Due to time restrictions, this has necessarily been on a strictly reconnaissance basis but because of personal knowledge of all but the New Mexico group we feel that this investigation is sufficient for the present purposes.

In general we have been able to satisfactorily determine that all groups are as represented. No corners that could be positively identified as belonging to the Old Timer Group were found but the road pattern and diggings location match very well.

There may be some doubt as to the validity of the claims as none of them seem to have any work done on them very recently. Validity in this context, means unpatented claims being very tightly held in a manner which completely prevents any possible entry of third parties. This sort of "validity" situation is common, partly because burden of proof is on the adverse claimant. However, even though affidavits of labor are filed, in the event of a contest, it might be required to prove that work was actually done. In such a case, the labor affidavit may be considered only prima-facie evidence and not proof.

The JN claim group consists of 37 lode claims, located in the Redrock Mining District, Santa Cruz County, Arizona. They were located by Jay E. Fuller and Natalcha M. Fuller. The location notices are as follows:

<u>Name of Claims</u>	<u>Record of Mines</u>	
	<u>Book</u>	<u>Page</u>
JN-4 to JN-9	061	613-618
JN-16 to JN-19	063	443-446
JN-1 to JN-3	064	264-266
JN-10 to JN-15	064	274
JN-22 to JN-38	086	207-223

The (1968-69) Affidavit of Labor Performed and Improvements made is included in this report.

Location work was on file as well as assessment work for 1966-67, 1967-68, and as included 1968-69.

JN Group     Sections 8, 14, 15, 21, 29, T. 22 S., R. 17 E.  
Santa Cruz County, Arizona.

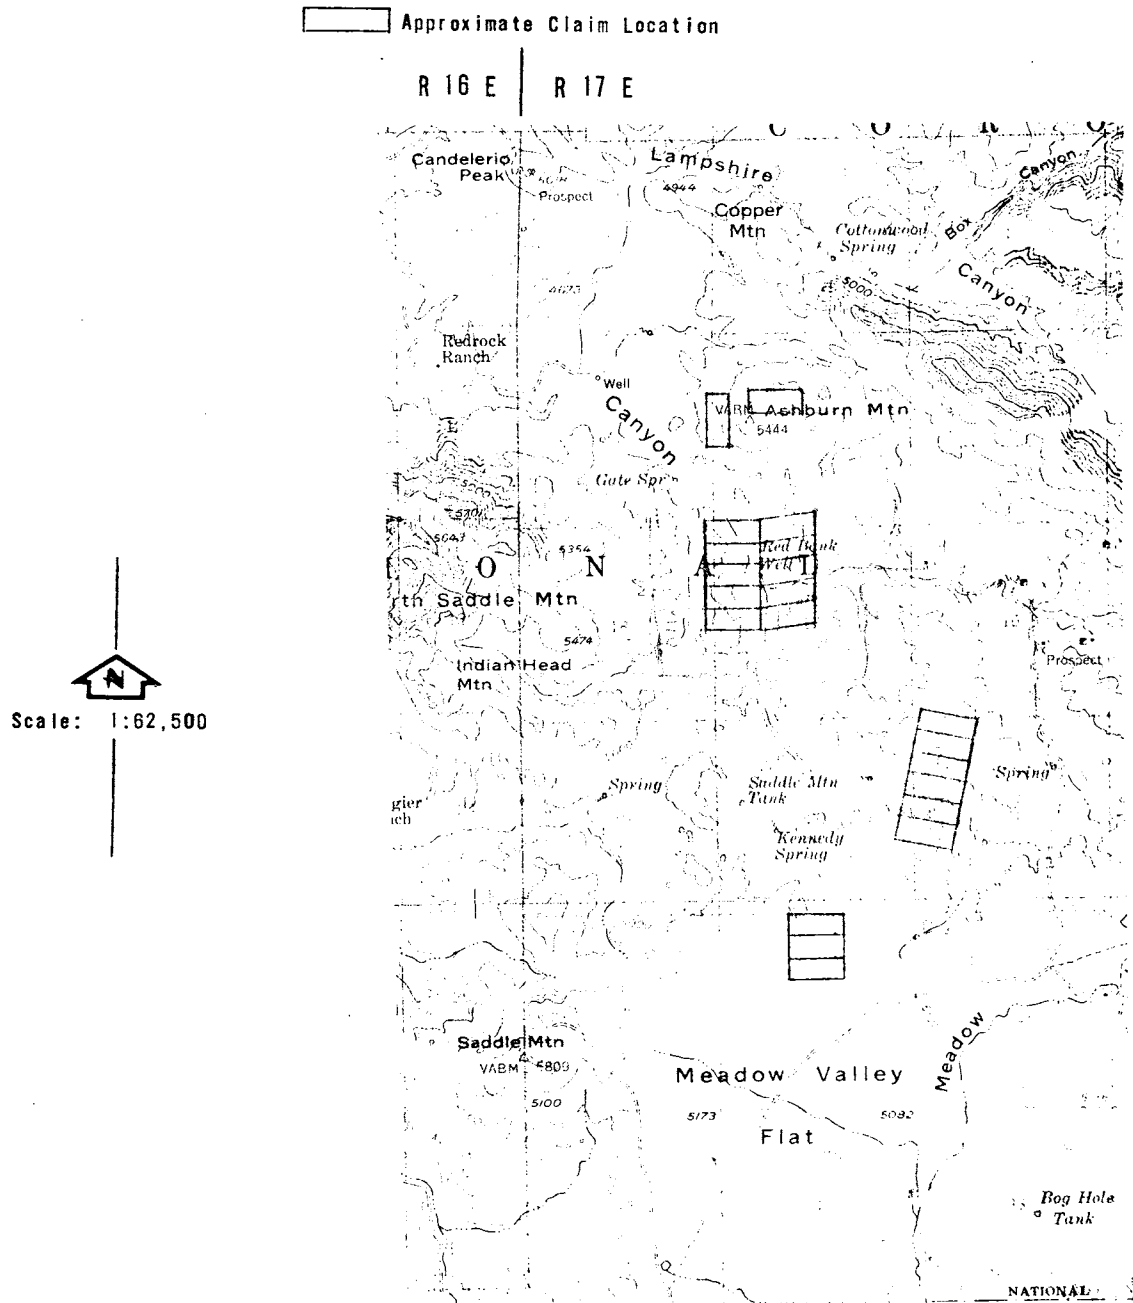

These claims have been located on the ground for the most part. Claims JN 4, 5, 6, 7, 8, 9, 16, 17, 18 and 19 were verified on the ground. The location notices for 4 and 9 and 5 and 8 were located and read, also for JN 34 which is immediately south of JN 18 but not included in this group.

In area 2 E, a 4 x 4 post with an affidavit of location work by drilling was found for JN 15. The other claims were not located in this group but presumably are there.

JN claims 1, 23, 20 and 21 were not found but are probably located on the ground. Our reference was an aerial photo overlay but we did not have the photos to accompany the overlay. Because our references were to photo numbers and the largest and easiest to find block of claims was in an area of intense staining we assumed the claims were located on color anomalies probably by aerial photography. By following this line of reasoning the other claims were located. Other patches of color anomalism exist in the areas of the unlocated claims so we therefore assume they are also present.

The main block of claims appear uncontested but 10 through 14 are partly overstaked on the east at least and probably because the JN claims appear invalid by reason of lack of visible annual assessment work. The possible conflicting claims were located by Mr. Roy Wingo in April and June 1969 and in part are the 3 Oaks Nos. 29, 32, 33, 42 and one in which the number was deleted in the location notice.

The Old Timer and Los Jarillas claim groups consist of one patented and six unpatented claims in Santa Cruz County, Arizona.

The location notices are recorded in Santa Cruz county as follows:

	<u>Docket</u>	<u>Page</u>
Old Timer lode mining claim (patented)	040	302
Old Timer No. 1 Amended	8	281
Old Timer No. 2	7	504
Old Timer No. 3	9	490
	<u>Book M.L.</u>	
Los Jarillas No. 1	30	151
Los Jarillas No. 2	30	152
Los Jarillas No. 4	30	154

A Quitclaim Deed for the above six (excluding the patented claim) is recorded in Santa Cruz County in Docket 052, page 339.

Assessment work was on file in Fuller's office for the years between 1956-57 to 1968-69 for the above six claims. Copies of the 1968-69 affidavits of labor for the Old Timer and the Los Jarillas claim groups are enclosed.

Old Timer Group      (Sec. 2 (unsurveyed) & 3) T. 23 S., R. 15 E.  
Santa Cruz County, Arizona.

We were able to recognize the road pattern, shafts and cuts but found no claim corners we could absolutely identify. Many piles of rocks were found and a few posts that correspond to the location of the corners that show on the plat map supplied by Mr. Fullers office.

A location notice of W.S. Mariott August 7, 195-O.K. Claim was found at the NE corner of the Old Timer Claim. The paper was wet and discolored and mostly illegible.

At the point on the plat map at the 875 mark between Old Timer No. 1 and Old Timer No. 2 the following location notice was found.

Old Rattler Mining Claims  
Willis J. Pohea, Jr.  
5 May 1968

The rock is altered and stained in this area. The numerous workings, though small, show little visible mineralization. The workings for the most part appears to be shallow and follows small "veins" of altered rock. The Lookout, Domino, and the 3 R Mines are now active but nothing is known about them. West Range Copper Company has a sign on the Ventura Mine road, as follows, West Range Ventural Division. The mine was not visited and the extent of the activity here is unknown.

This property certainly deserves a careful and complete examination in order to evaluate its possible economic significance.

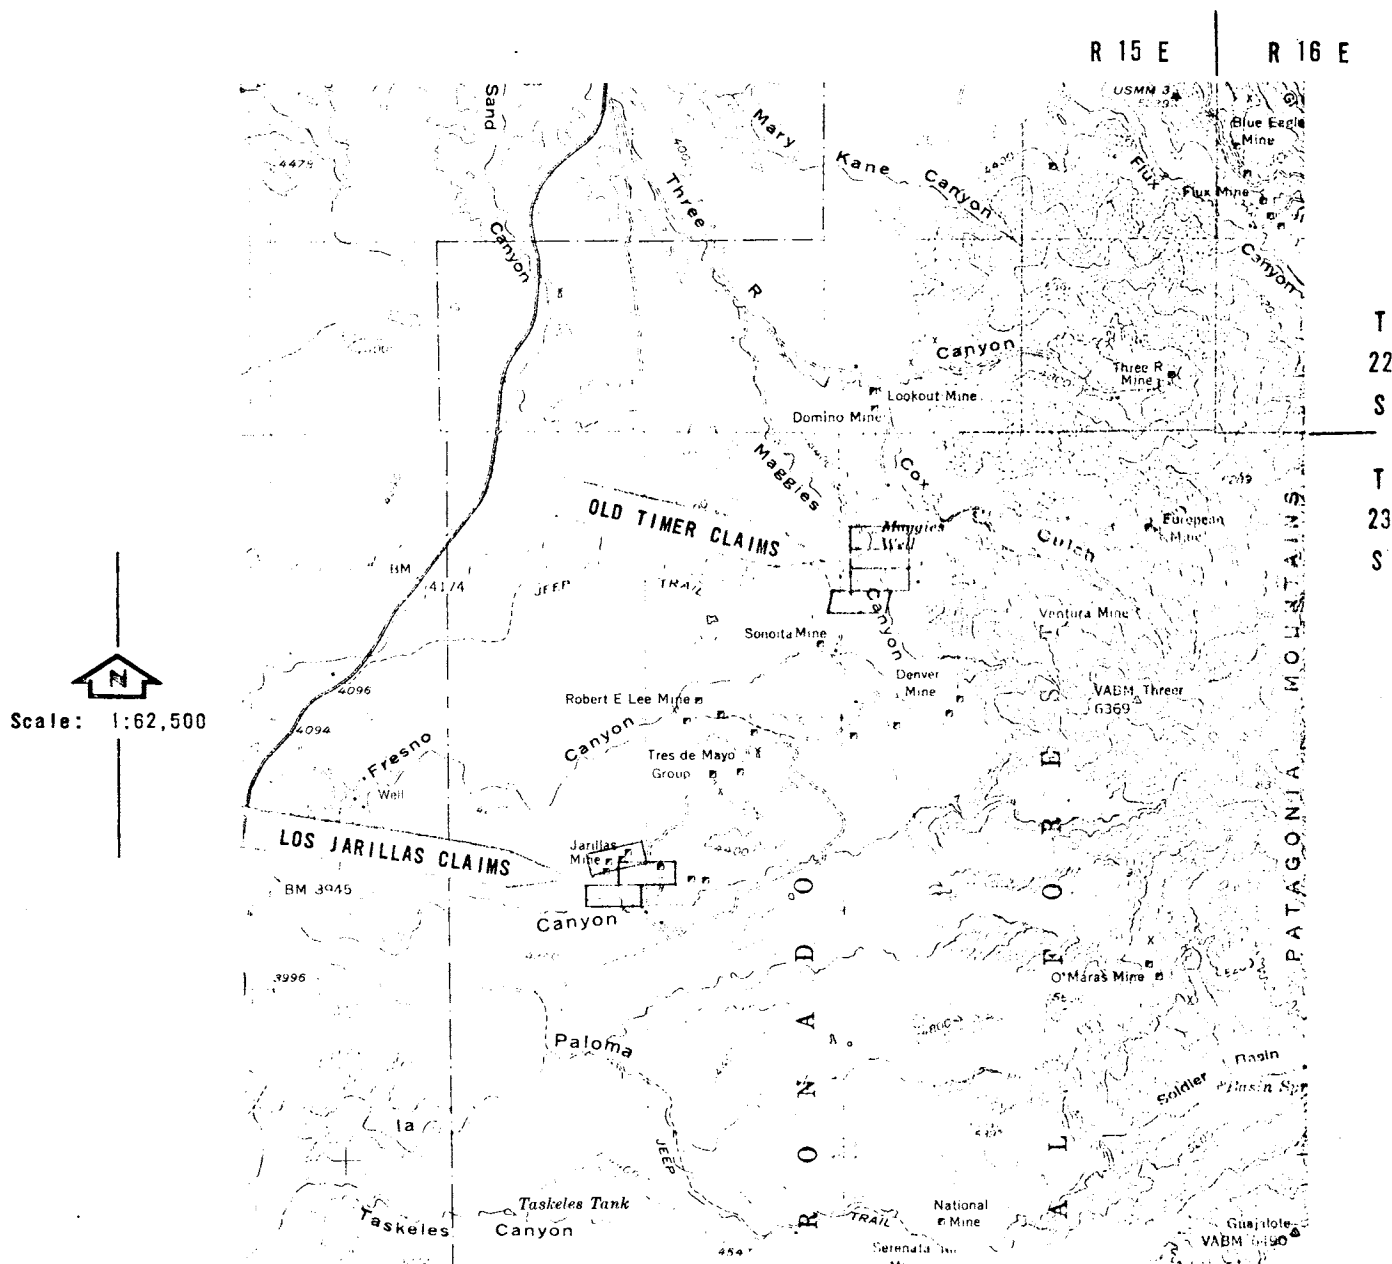

Los Jarillas Group      (Sec. 9 & 10) T. 23 S. R 15 E; Santa Cruz  
County, Arizona.

The section corner common to sec. 9, 10, 15 and 16 T. 23. S., R. 15 E. was located in the field. The Surveyors pins, 1" pipe and bronze cap, for No. 1 (SE) corner Los Jarillas No. 4 and # 2 cor (NW) for Los Jarillas No. 2 were found. The claims are very likely as shown on the plat supplied to us. A location notice for Los Jarillas No. 4 by Wes Donaldson, 21 July 1969 was found in the rock monuments at shaft 5 on Los Jarillas No. 1 (as shown on our plat).

The property shows little mineralization and not much staining or alteration, however, it is located in an area of continued exploration and interest, by numerous mining companies and ourselves. As such, the property deserves a more careful look to help determine its maximum economic potential.

The S.O.B. claim group consists of 149 claims located in the Pioneer Mining District, Pinal County, Arizona. They were located by J.E. Fuller.

Some of the S.O.B. claims were overstaked by B.O.S. claims of the same numbers. These were located by John L. Splane, Robert Holt, and Jay E. Fuller. These were claim Nos. 4, 6, 8, 10, 12, 23, 25, 27, 29 and 31.

These claims are located as follows:

<u>Name of claims</u>	<u>Docket</u>	<u>Page</u>
SOB Nos. 1-60	445	152-211
SOB Nos. 61-82	446	171-192
SOB Nos. 83-91	451	365-373
SOB Nos. 92-100	446	193-201
SOB Nos. 101-149	455	56-104
BOS Nos. 4, 6, 8, 10, 12, 23, 25, 27, 29, & 31	470	129-138

The (1968-69) Affidavit of Labor Performed and Improvements Made is included in this report. This affidavit shows that the property was optioned to Aluminium Company of America at the time of assessment work.

S.O.B. Group      Secs (34, 35 & 36 (unsurveyed) T. 1N. R. 12 E.,  
& sections 1, 23, 10, 11, 12, T. 1S., R 12 E.;  
Pinal County, Arizona.

These claims were located in the field and the following location notices were found: S.O.B 23 through 31 and a drill site which states labor done on S.O.B 88 for S.O.B claims 88 - 91, 116 - 119, 129 and 130.

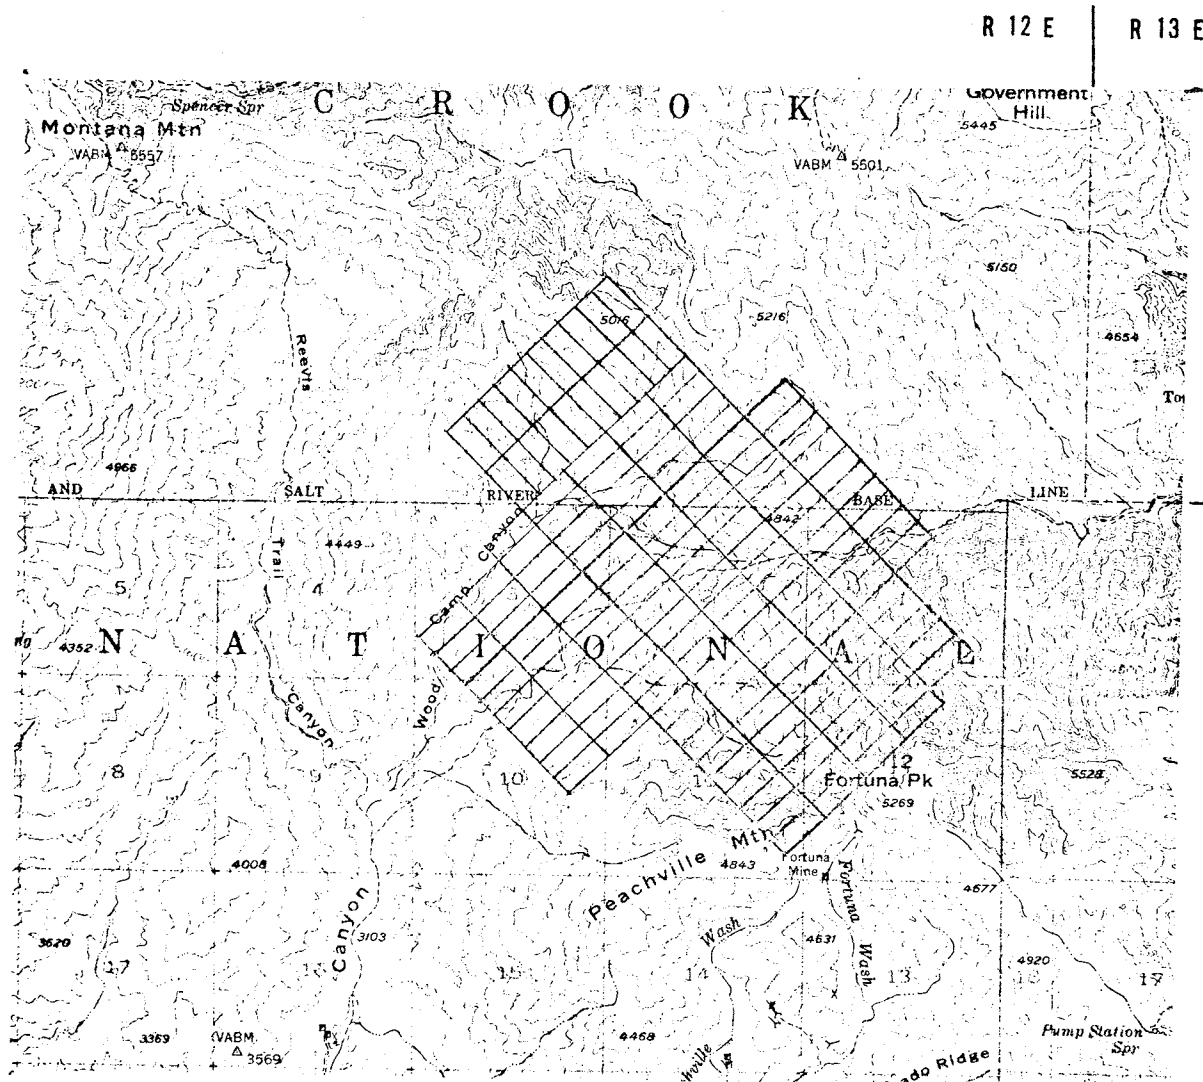

A claim on this group not belonging to the S.O.B. Group was found and reads as follows: Eureka # 10, sec. 3 T. 15, R. 12 E. N.H. Caruso, B.C. Wilson and A.G. Kano. Probably at least mine (9) other Eureka claims are in this area.

We know of very interesting induced polarization and magnetic anomalies on this property that probably have been incompletely tested by drilling. We feel that this property definitely has merit.

The Monarch claim group consists of 20 claims. Nineteen are located in Pima County with one in Santa Cruz County, Arizona. The claim location affidavits are listed in Pima County as follows:

<u>NAME</u>	<u>BOOK</u>	<u>PAGE</u>
Monarch No. 1	III	526
Monarch No. 2	PPP	126
Monarch No. 3	PPP	127
Monarch No. 4	PPP	127
Monarch No. 5	PPP	128
Monarch No. 6	III	528
Monarch No. 7	PPP	128
Monarch No. 8	PPP	217
Monarch No. 9	PPP	163
Monarch No. 10	PPP	217
Monarch No. 12	PPP	230
Monarch No. 13	PPP	231
Monarch No. 14	PPP	231
Monarch No. 16	III	526
Monarch No. 17	PPP	501
Slim Jim	PPP	125
County Line	PPP	162
Timber Line	PPP	161
Border Land	III	525

The claim called Monarch No. 16 is also known as the Helen Claim. Monarch No. 6 had its east half conveyed by Quitclaim Deed in Book 50, Page 244 in Pima County. The claim Monarch No. 17 is amended and may be found in Book 73, Page 273 in Pima County.

The claim Gold Seal No. 2 is located in Santa Cruz County with its location recorded there in Book 25, Page 86 of that county.

Two Quitclaim Deeds show the claim titles going to Jay E. Fuller. The claims in Pima County have their above record in Book 3575, Page 216, while the claim in Santa Cruz County is listed in their Docket 106, Page 22.

Affidavits of Labor Performed and Improvements Made are on hand for the following years on all the claims: 1962-63, 1963-64, 1964-65, 1966-67, 1967-68, and 1968-69. A copy of last years affidavit for the work in Santa Cruz County is contained in this report the record of the work for that year for the claims in Pima County is recorded in Book 3571, Page 122.

Monarch Group            Sections 21, 22, 27, 2 S 32, 33, 34, T. 19 S.,  
R. 16 E. Pima County, Arizona and sec. 6 T. 20 S.,  
R. 16 E; Santa Cruz County, Arizona.

These claims lie in sec. 21, 22, 28, 29, 27, 32, 33, 34 T. 19 S., R. 16 E., and in N  $\frac{1}{4}$  sec. 6 T. 20 S., R. 16 E.

These claims appear to be present as represented. A number of 2" pipes with lead caps were located in the field. These monuments are marked with a coded inscription but they appear to represent the claim corners. This can be ascertained exactly by requesting a certified copy of the field notes from the Surveyor. Appended is a list of monuments found in the field.

Near most of the monuments a 4" x 4" post with a 1" pipe with cap in the top with a "U" stamped on the cap has been found. In a few places these 4 x 4's have been found without the pipe monuments such as the NE corner of Gold Seal.

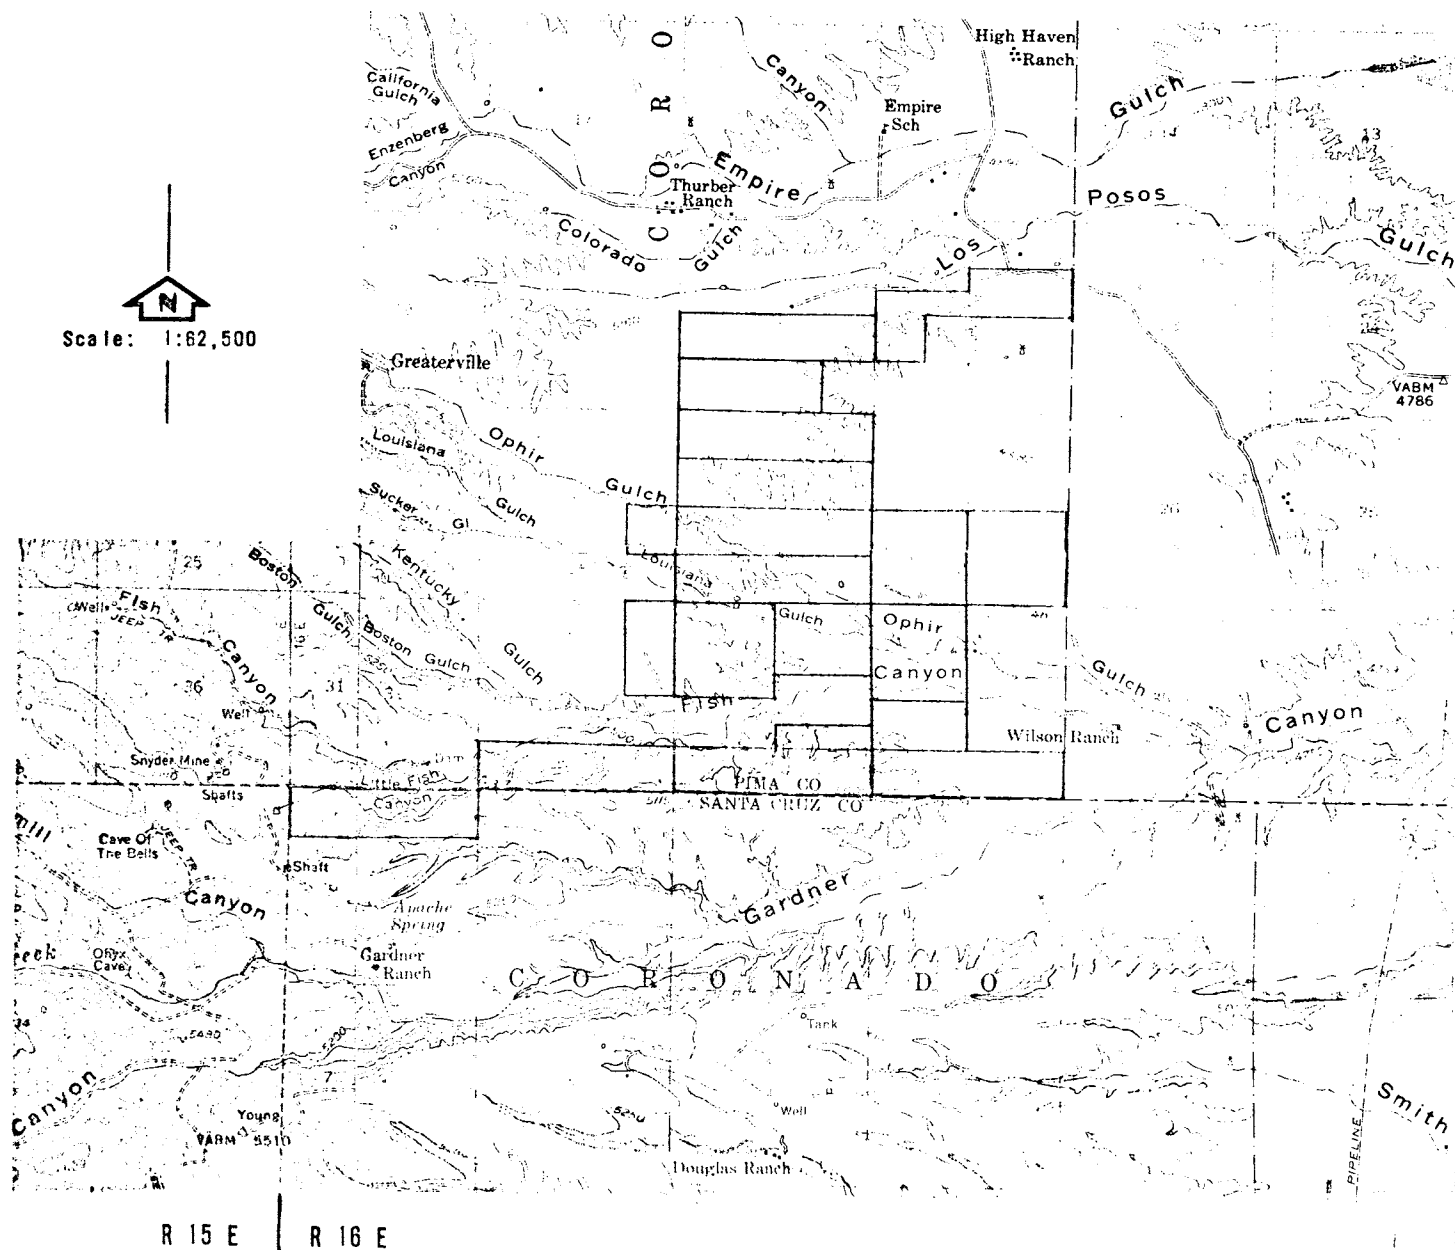

The area is entirely alluvium covered. There are some trenches that may have been test areas for placer deposits. The head waters of these streams originate in an area where lode gold claims have been worked. The placer potential of this area is unknown at this time and will require extensive trenching, drilling and sampling to determine. The potential will always remain until sufficient work is done on the area to prove or disprove the theory. The property is worth some risk expenditures on a small pilot scale to test. Ownership of the surrounding land should be checked. Most of this is probably state or federal ground but a number of ranches have improved and developed the grazing, and may have some patented or homestead land in the group.

The entire area is easily accessible and electric power lines already cross the property. The north east part of the area was not so easily examined due to locked gates and "no trespassing" signs but the claims are probably equally valid there.

An active land survey is underway on the south boundary of the property and panelling has been set out for aerial photos. A drill rig could be seen about a half mile to the south.

CORNERS & MONUMENTS  
OF  
MONARCH GROUP  
FOUND IN THE FIELD

(Not to scale, code unknown)

The Lucky Strike claim group consisted of 320 claims designated as Lucky Strike Number 1 through Lucky Strike Number 320. The claim location affidavits are listed in Book 5 - J of Mines Records of Mohave County, Arizona.

Claim No. 1 - 220 on pages 149 - 368

Claim No. 221 - 320 on pages 373 - 472

They were located in 1960.

Affidavit of Labor and Improvements Made were in the Fuller, Tucson Office, as follows:

Claims # 1 - 358 for 1964-65

# 1 - 358 for 1965-66

# 1 - 320 for 1967-68 Book 2 - B pages 52 of proof of Labor, Mohave County.

# 1 - 320 for 1968-69 Book 2 - D, page 199 of proof of Labor, Mohave County.

The last assessment work (1968-69) performed was for Mohave Copper Corporation as were the claims located for by Charles R. Kimes, Robert T. England and were filed and recorded at the request of Feeman Lomelino. Ownership to J. Fuller Resources has not yet been established by Heinrichs GEOEXploration Company. More information will follow on the ownership at a later date. A copy of the affidavit of Labor Performed and Improvements Made for the year 1968-69 is enclosed. Several claims on the claim group overlay other claims in the area. It is not yet known if these other claims are valid or not. Approximately nine claims are in question.

Lucky Strike Claim Group

Sec. 19, 20, 21, 27, 28, 29, 30, 31,  
32, 33 & 34 T. 12 N., R. 14 W. sec.  
4, 5, 6 T 11 N, R. 14 W., Mohave  
County, Arizona.

These claims on the plat map furnished GEOEX are referred to as the Alamo Copper Prospect. Because of rains in the area we were unable to get to verify the existence of the claims on the ground.

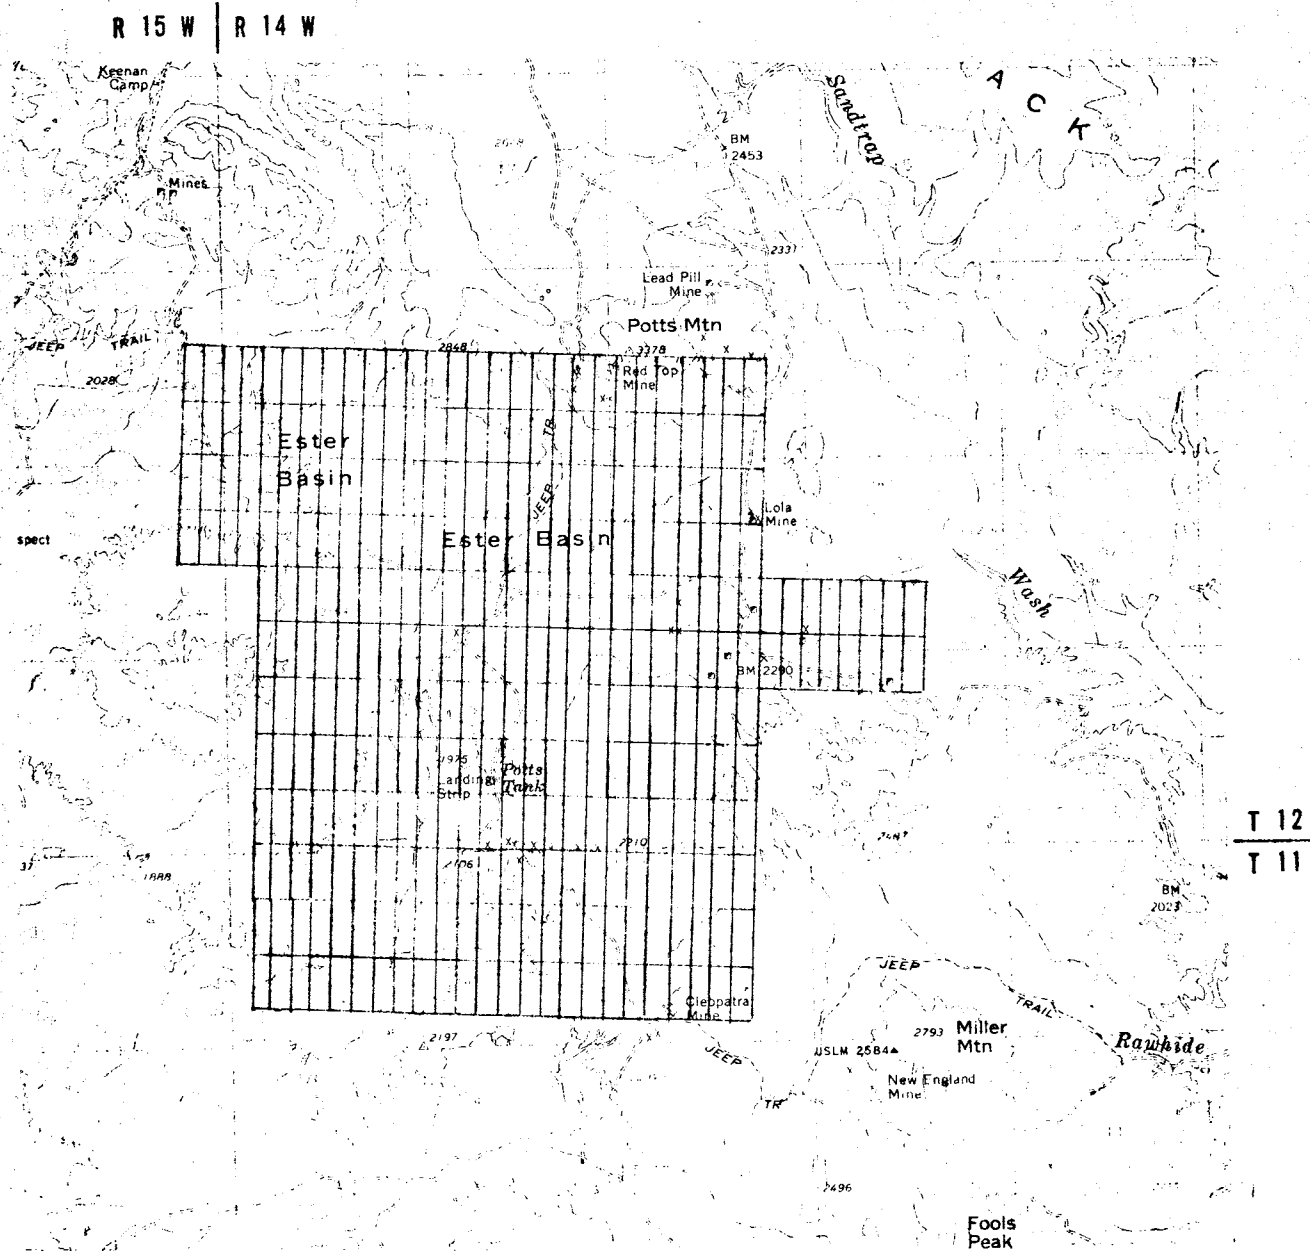

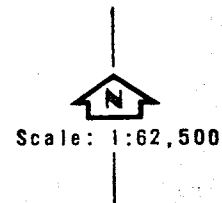

Geologically, this area is one of major structural intersections, possibly favorable host rocks for major mineralization and numerous small mines. Several mines in the area have had good production in the past i.e. Swansea and McCracken Mines and many smaller mines have been active in the past.

If all of these claims are valid and can be held together in this compact block, enough ground is available for a comprehensive investigation to turn up a possibly economic mineral deposit.

We feel that this area has a very good potential for producing a medium to large sized mine and recommend a comprehensive exploration program be conducted in this area.

The Queens Crown Claims, Catron County, New Mexico are a group of six patented claims. They are:

<u>NAME</u>	<u>MINERAL SURVEY NO.</u>
Gold Bar # 1	2140 - A
Gold Bar # 2	2140 - A
Gold Bar # 3	2140 - A
Queens Crown No. 2	2140 - A
Look Off No. 1	2140 - A
Margaret Stewart	2140 - A

The above claims are jointly owned by Jay E. Fuller and Natalcha M. Fuller, husband and wife, with John L. Splane and Louise D. Splane. The couple of Jay E. Fuller and Natalcha M. Fuller own 82% with 12% being held by the other parties above.

The claims are being bought from a party of four who obtained it by inheritance. These are Betty Jane Culberson, Ruth Ann Rogers, John Carl Frymire and Ruth Ann McBride. This trust is being handled by the American National Bank, Silver City, New Mexico. Taxes were paid for 1969 on the claims for \$29.34.

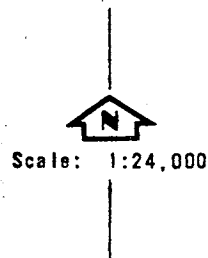

The Quitclaim Deed of the above transaction is recorded in Vol. N of Deeds pages 320 - 321, Catron County, New Mexico. A copy of the above is included in this report.

Queens Claim Group      sec. T. 12 S., R. 18 W.; Catron County,  
New Mexico.

This claim group has been found and partially verified on the ground. Corners for Gold Bar 2, 3 and 4 were found as stamped blazes on trees and rocks. The posts on the ground are now illegible. At least part of these claims lie within the Gila Wilderness area and a careful check must be made that these claims were valid at the time of mineral withdrawal. Very likely the Forest Service had them checked at the time the mineral withdraw act was put into force. A road, no longer maintained, exists up to the wilderness boundary and at least one frame cabin exists on Gold Bar No. 5 that could be fixed up at a minimal cost.

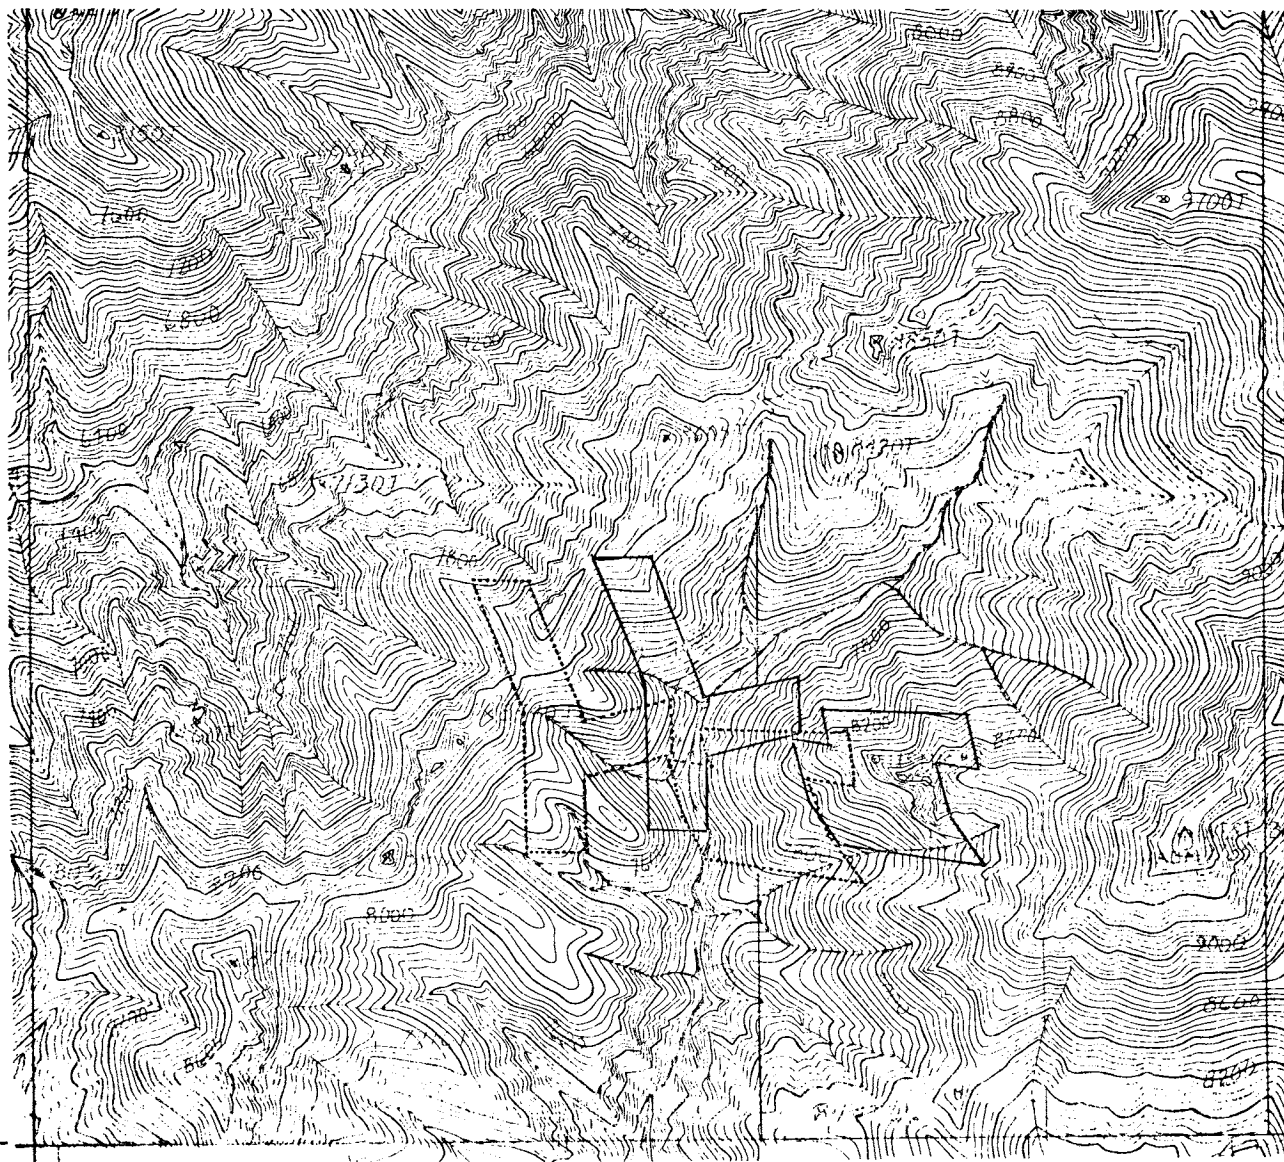

Because of a snow cover often in excess of a foot and more coming down, very little of the property was seen except along the trail in the valley. Only one small cut and possibly two more up a hill were seen. The rocks are slightly altered and stained with considerable fracturing. Regionally the property is in an area that could have mineral potential but very little mining has gone on in the immediate area that we are aware of. The property is small and problems with the Forest Service, regardless of legality of the claims are likely and these two factors must be considered. Once the validity of the claims has been established, a careful sampling program should be carried out to evaluate this group of claims.

QUITCLAIM DEED

THIS INDENTURE , Made the 14<sup>th</sup> day of February, 1968, between  
JOHN L. SPLANE AND LOUISE D. SPLANE, Husband and wife.

Grantors and JAY E. FULLER AND NATALCHA M. FULLER, Husband and wife.  
Grantees.

WITNESSETH: That the said grantors , for and in consideration of the  
sum TEN AND NO/100 (\$10.00) DOLLARS to them in hand  
paid by the said grantees, the receipt whereof is hereby confessed  
and acknowledged, have, released and quit-claimed, and by these presents do  
release and quitclaim unto the said grantees and to their heirs and  
assigns forever, an eighty-two percent (82%) undivided interest in  
the right, title, interest, claim and demand which the said grantors  
have in and to the following described property situated in the County  
of Catron, and State of NEW MEXICO, to-wit:

Eighty-two percent (82%) undivided interest to JAY E. FULLER AND  
NATALCHA M. FULLER, husband and wife, in and to those certain patented mining  
claims situated in Section 17 and 18, Township 12 S., Range 18 W.,  
N.M.P.M., in the Wilcox Mining District of Catron County, New Mexico  
identified as follows:

<u>NAME OF CLAIM</u>	<u>MINERAL SURVEY NO.</u>
Gold Bar #1	2140-A
Gold Bar #2	2140-A
Gold Bar #3	2140-A
Queens Crown No. 2	2140-A
Look Off No. 1	2140-A
Margaret Stewart	2140-A

TO HAVE AND TO HOLD the same togetherwith all the appurtenances  
thereunto belonging, to the grantees heirs and assigns forever.

IN WITNESS WHEREOF, the said grantors have hereunto set thier  
hands the day and year first above written.

S/ JOHN L. SPLANE  
S/ LOUISE D. SPLANE

STATE OF ARIZONA )  
COUNTY OF PIMA ) SS

On this the 14<sup>th</sup> day of February, 1968, before me, Jean Bayer,  
the undersigned Notary Public, personally appeared JOHN L. SPLANE AND  
LOUISE D. SPLANE, known to me (or satisfactorily proven) to be the  
persons whose names subscribed to the within instrument and acknowledged  
that they excuted the same for the purpose therein contained.

In witness whereof I hereunto set my hand and official seal.

My commission expires 20 Sept. 68

S/ JEAN BAYER, Notary Public

STATE OF NEW MEXICO )  
COUNTY OF CATRON )

I, Jean W. Atwood, County Clerk, Catron County, Reserve, New Mexico, do hereby  
certify that the foregoing instrument is a true, correct, and complete copy of said  
Quitclaim Deed as recorded in my office on March 18, 1968 in Vol. N of Deeds, Page 320-321.  
Witness my hand and seal this 3rd day of March, 1970.

Deputy

JAY E. FULLER  
RESOURCES COMPANY

Essay Copy

S. O. B. CLAIMS

Pinal County, Arizona

Copper, Gold, Silver, & Moly

Number of

Claims: 149 unpatented lode claims, approximately 2980 acres (original staking).

Ownership: The claims were staked and surveyed in 1965.

Location: This property is located approximately 4 miles north of the Magma Mine at Superior, Arizona, and west of the open pit copper mine at Miami, Arizona. City Service's new ore body is to the north-east, and Occidental Petroleum is drilling one to the east. The mine at Superior has been in operation since 1906, and the mines at Miami and Globe have been in operation since 1896. The mine at Superior has also the highest grade mill heads in Arizona, running at 6% copper.

The property has an excellent I.P. anomaly about 4000' x 7200' and ground mag, geochem, and geology, all in good correlation. There is a diamond drilling project in progress on the property to the southwest.

Considering the location of this property expressions point favorably to the possibility of a sizeable ore body.

J. N. CLAIMS

Santa Cruz County, Arizona

Copper, Gold, Silver, & Moly

Number of

Claims: 37 unpatented lode claims, approximately 740 acres.

Ownership: Claims were staked in 1962 and surveyed in 1967.

Location: This property is located approximately 5 miles southeast of Patagonia, Arizona, in an area that is taken up in a block for hundreds of square miles from Nogales, Arizona, to Patagonia, Arizona, to the Mexican border, by such companies as Kerr-McGee Corporation, Anaconda, Kennecott, American Smelting and Refining, U. S. Smelting, Phelps Dodge, Utah Construction, Noranda of Canada, Simplot, and Others.

The immediate property to these claims is in the diamond drilling phase of their exploration, and considering the extent of their drilling, it has been reported that they have spent in excess of \$3,000,000.00, and are in the process of delineating a large ore body.

The geographical as well as geological location of this property is favorable for a large copper deposit, and exploration, such as a significant geochemical anomaly measuring some 1000' x 2500' in an area of a significant breccia pipe, points in this direction.

## OLD TIMER CLAIMS

Santa Cruz County, Arizona

Silver, Gold, Copper & Moly

Number of

Claims: 1 patented and 3 unpatented lode claims, approximately 80 acres.

Ownership: In 1960 the claims were surveyed and title abstracted by advertising.

Location: This property is located approximately 6 miles southwest of Patagonia, Arizona, in an area that is taken up in a block for hundreds of sq. mi. from Nogales, Arizona, to Patagonia, Arizona, to the Mexican border, by such companies as Kerr-McGee Corp., Anaconda, Kennecott, American Smelting & Refining, U. S. Smelting, Phelps Dodge, Utah Construction, Noranda of Canada, Simplot and others.

Noranda has been diamond drilling their property and it has been reported that they have spent over \$2,000,000.00, and they have delineated copper ore bodies high in moly content.

This property has old workings, including a shaft where it is reported that a considerable sum of high grade silver was taken out in the 1800's, running as high as 2000 oz per ton. Near this old shaft, on a 7' zone, a sample was taken and it run 200 oz in silver.

There is a large geophysical structure underground running from the property on the west boundary, with the heavy part of the anomaly under ground on this property. This was reported to us by the owner of the adjoining property.

Noranda has diamond drill holes within a few feet of the south boundary line.

This property is in an extremely well located area.

## LOS JARILLAS CLAIMS

Santa Cruz County, Arizona

Silver, Gold & Copper

Number of

Claims: 3 unpatented lode claims, approximately 60 acres.

Ownership: The claims were purchased in 1960, surveyed and title abstracted by advertising.

Location: This property is located approximately 7 miles southwest of Patagonia, Arizona, in an area that is taken up in a block for hundreds of square miles from Nogales, Arizona, to Patagonia, Arizona, to the Mexican border, by such companies as Kerr-McGee Corp., Anaconda, Kennecott, American Smelting & Refining, U. S. Smelting, Phelps Dodge, Utah Construction, Noranda of Canada, Simplot and others.

P.D. and Noranda each have properties in the immediate area and Noranda is in the diamond drilling phase of their exploration. Regarding the extent of their drilling, it has been reported that they have spent in excess of \$2,000,000.00 and have delineated copper ore bodies high in moly content.

This property has old workings and assaying channel samples of the dump, and some of the values run as high as \$40 per ton, with values being high in silver.

Schrader in his book of 1915 speaks highly of this property, and considering the activity of the major companies surrounding the property at the present time, bears out his opinions of the district.

LUCKY STRIKE CLAIM GROUP

Mohave County, Arizona

Copper, Gold, Silver & Moly

Number of

Claims: 288 unpatented lode claims, approximately 5760 acres.

Ownership: Claims were staked and surveyed in 1960.

Location: This property is located approximately 20 miles northeast of Parker, Arizona, and 10 miles north of the Swansea and Planet Mines. The Swansea Mine has been reported to have had the first mill on the North American continent. The concentrates were shipped down the Bill Williams River to the Colorado River, and then to Swansea, Wales.

When this property was staked in 1960, there were no roads other than a few trails. Now the property is accessible by a new, wide, well-traveled gravel road, and the area is now attracting many mining and oil companies.

The old McCracken Mine, about 5 miles to the north, is being opened up again by Mr. B. O. Brynelsen of Vancouver, British Columbia, who is associated with Noranda Mining Co. of Canada. He is installing a several million dollar mill and it is reported to be a large open pit operation.

The geological expression for the Lucky Strike Claims, on a regional basis, is favorable for a large copper deposit, and the exploration to date, such as magnetometer, I.P., geochemical, etc., points in this direction.

QUEENS CROWN CLAIMS

Catron County, New Mexico

Gold, Silver, Lead, Copper & Tellurium

Number of

Claims: 6 patented lode claims, approximately 120 acres.

Ownership: Claims purchased in 1960 and they are surveyed and title is in fee and has been abstracted.

Location: This property is located about 50 miles north of Silver City, New Mexico, in the Mogollon Mountains, approximately 7000' elevation with plenty of water and living quarters on the property. There are mines operating in the immediate area, and it is reported that major companies are becoming interested in the potential of the district.

According to an old report by Samuel D. Strain of Silver City, and the book entitled "Minerals of New Mexico", this property could develop into a large significant operation. There are several old workings on the property, and it is reported that a considerable amount of high grade ore was taken out.

MONARCH CLAIM GROUP

Pima County, Arizona

Placer Gold & Porphyry Copper

Number of

Claims: 20 unpatented placer claims - 2760 acres.

Ownership:

The claims were purchased from the son of the original locater in 1953, and we had them surveyed and title abstracted.

Location:

This property is located approximately 45 miles southeast of Tucson at Greaterville, Arizona, on gravel road one mile off paved highway in an area where Anaconda has acquired all the properties on three sides. In fact, one of the adjoining properties, about the same size as the Monarch Group, has been reported to have been optioned by Anaconda for \$8,250,000.00. Anaconda is diamond drilling in close proximity to our boundary lines and it is reported that they have an ore body.

This property not only has a significant placer gold deposit in the alluvial, but could also have a porphyry copper deposit below the alluvial. Anaconda also has copper ore bodies a short distance to the north at Rosemont and at Helvetia.

Past production records date back to the 1800's, and Schrader reports in his book of 1915 that there should be \$500,000,000.00 worth of gold in the alluvial of this area.

Considering the exploration work on this property and Anaconda's adjoining, makes this property extremely valuable.
