The following file is part of the Grover Heinrichs Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

October 30, 1973

H. Darby Hand (who describes himself as petroleum geologist) presented The Jane Group of 73 unpatented mining claims in Copper Basin south of Crown King.

In 1966 claim group was re-surveyed by Bob Ford who drilled 8 holes to depths of about 400 feet. Utah Construction later drilled an angle hole to a depth of 1012 feet. Recently EXXON Minerals drilled 5 core holes to depths up to 3100 feet.

Actual owners names not mentioned but deal with them calls for ~~by~~ buy out of \$500,000 to be paid at \$5000 per year or 4% NSR.

This option is held by a Hale Tognoni group called Multiple Use (formerly Minerals Trust). Hand-Fulton Ventures own 70% of Multiple Use, but Tognoni has responsibility for all deals. They are thinking of a standard mining lease with a minimum annual royalty.

One estimate is for 500 million tons @ 0.14% Cu
0.017% Mo.
