The following file is part of the Grover Heinrichs Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

GEOLOGY AND ORE DEPOSITS
OF THE SHASTA GOLD DISTRICT

By
Victor Frederick Hollister
B.S. (University of California, 1948)

T H E S I S

Submitted in partial satisfaction of the
requirements for the degree of

Master of Science
in
Mineral Mining
in the
Graduate Division
of the
University of California

Approved:

Edward W. Wissler
Francis J. Turner
Thurston A. Hall

Committee in Charge.

Deposited in the University Library

GEOLOGY AND ORE DEPOSITS OF THE SHASTA GOLD DISTRICT

Table of Contents

Purpose and Scope.....	1
Summary.....	1
Description of the District.....	2
a. Location and Geography.....	2
b. History.....	3
c. Climate.....	4
d. Topography.....	4
e. Previous Work.....	5
Stratigraphic Column.....	10
Geology of the District.....	11
a. Stratigraphy and Petrology.....	11
(1) Major Features.....	11
(2) Metamorphic Rocks.....	11
Copley Meta-volcanics.....	11
Balaklala Meta-volcanics.....	18
Kennett Shales.....	25
(3) Stratified Rocks.....	27
Chico.....	27
Red Bluff.....	28
Quaternary Alluvium.....	29
(4) Intrusive Rocks.....	29
Mule Mountain Stock.....	29
Dike Rocks.....	32
b. Structure.....	40
c. Geologic History.....	43
d. Physiography.....	46
Mineral Deposits.....	47
a. Types.....	47
b. Order and Deposition of Metals.....	48
c. Structural Control.....	49
d. Production.....	50
(1) Ore Controlled by Fractures in Stock.....	51
Alice Mine.....	51
Compton Claim.....	51
Gold Chariot Mine.....	51
Old Spanish Mine.....	54
Sallee Mine.....	54
(2) Ore Controlled by the Contact of the Stock and the Metamorphics.....	54
Black Diamond.....	54
Boswell Group.....	55
Crown Point and Midnight Mine.....	55
Jensen Mine.....	56
(3) Ore Controlled by Fractures in the Metamorphics.....	56
Brackett Mine.....	56
Buena Vista Mine.....	57

Bunker Hill Mine.....	58
Corrine Mine.....	58
Oro Grande Mine.....	58
Rattlesnake Mine.....	58
Salt Creek Group.....	59
Eureka Tellurium Mine.....	59
Gold Leaf Mine.....	59
Lechner Prospect.....	60
Sugarloaf Mine.....	60
Three R Prospect.....	60
The Yankee John Mine.....	60
(4) Ore Controlled by Bedding Plane	
Fractures.....	61
Saddle Pocket Mine.....	61
(5) Ore Controlled Along the Borders of	
a Dike.....	62
Silver King Mine.....	62
Reference Index to Mines and Prospects.....	63
Bibliography.....	65

ILLUSTRATIONS

- Figure 1 Redding, California, showing location of area mapped and the area around it. (Redding, Calif. Quadrangle)
- Figure 2 Geologic Map of Area Studied, published by J. S. Diller.
- Figure 3 Geologic Map by W. E. A. Hinds of the Redding-Weaverville Quadrangle.
- Figure 4 Photomicrograph of Actinolite Replacing Pyroxene.
- Figure 5 Photomicrograph of Clinzoisite Amphibole Schist.
- Figure 6 Photomicrograph of Balaklala Tuff (Slide 35A).
- Figure 7 Photomicrograph of Balaklala (Slide 37).
- Figure 8 Photomicrograph of Strained Quartz.
- Figure 9 Photomicrograph of Balaklala Quartz.
- Figure 10 Photomicrograph of zoned feldspar.
- Figure 11 Photomicrograph of Amphibole.
- Figure 12 Photomicrograph of Allanite.
- Figure 13 Photomicrograph of Sphene.
- Figure 14 Photomicrograph of Apatite.
- Figure 15 Photomicrograph of a Jurassic Keratophyre.
- Figure 16 Photomicrograph of Chalcopyrite replacing Galena.
- Figure 17 Photomicrograph of Covellite replacing Bornite.
