The following file is part of the Grover Heinrichs Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

 - 191 Ward
 - 192 Shoshone

- PRODUCTION IN POUNDS OF LEAD**
- 10, -1,000
 - 1,000 - 10,000
 - 10,000 - 100,000
 - 100,000 - 1,000,000
 - 1,000,000 - 10,000,000
 - 10,000,000 - 100,000,000
 - Over 100,000,000

Note: Production symbols are located near the geographic center of the mining districts and do not necessarily cover all of the mines contributing to the production. Production data was obtained from published figures of the U.S. Bureau of Mines, U.S. Geological Survey, Nevada Bureau of Mines, and various other sources. Production data prior to 1902 is difficult to obtain and in many instances it was necessary to estimate the production from available value and tonnage figures. In the past many districts have been credited with production that can not be substantiated. The production shown here is believed to be realistic and is based only on reliable statistics and estimates.

- CHURCHILL COUNTY**
- 1 Bernice
 - 2 Alpine
 - 3 Wander
 - 4 Chalk Mountain
 - 5 Eastgate
 - 6 Fairview
 - 7 Holy Cross

- CLARK COUNTY**
- 8 Bunkerville
