ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

NOTE

This map does not show all the tungsten mines in Nevada. Only those mines, whose locations and production are known with sufficient accuracy to provide an undistorted picture of tungsten distribution are on the map. Because production and location data are lacking, incomplete, or conflicting, many of the smaller mines are not shown. In a few districts, tungsten mines have been lumped together under the district name; most of the other mines not shown on the map occur in areas where there are concentrations of mines or a large mine exists.

The Nevada Bureau of Mines will appreciate receiving corrections or additions to the data shown on this map.
