The following file is part of the Grover Heinrichs Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Ken Palosky Hawthorne, Nevada

Buzzard Peak area, McIntire Mines
did drilling 1969-1970,

Homestake recently, developed

35 m. Tons 0.4 oxide Cu, 0.2 sulphide ^{to 0.3}

~~6000~~ 700' thick oxide zone. Sullivan stock.

originally Au property. Patented

claims under \$243 m Au. 35 ft

at .94% Cu @ 250' deep R Cu₂S
Blanket

(actually Paradise Peak)

(702) 945-3005

Box 345 Babbitt, Nev.

later report phoned in by Ken Palosky to
JKJ, undated, probably fall of 1971.

McIntire Mines did drilling during 1969-1970,
Then later work by Homestake developed
35 million tons at 0.4% oxide Cu, and
0.2 to 0.3% sulfide beneath 400 foot thick
~~superior~~ oxide zone.

This is the Paradise Peak area, Sullivan stock,
originally a gold property. Patented claims
in center of area contain \$2.43 in gold,
35 feet at 0.94% Cu @ 250 feet, Cu₂S
blanket

Ken Palosky Box 345, Babbitt, Nevada
(702) 945-3005

(Babbitt is government town near Hawthorne.)

DEPOSIT DATA SHEET

BY: J. K. Jones

DATE: May 11, 1971

| | | | |
|---|--|--|--|
| NAME OF PROPERTY: | | NUMBER: | |
| REFERENCES: | | | |
| PRODUCTION & RESERVES Palosky claims 30 million tons of oxide(?) drilled out. | | SAMPLES: Palosky reports 0.25% Cu from chip samples. | |
| METALLURGY: | | ENGINEERING: | |
| FACILITIES: | | EXPLORATION POSSIBILITIES: | |

ADDITIONAL INFORMATION OR SKETCH MAP:

U.S. Smelting reported drilling in area, oxide occurrence under option, Minerals Exploration Company mapping area in May 1971.

Data taken over phone by Clem Chase 4-6-71. Palosky talked to Grover(?) 4-28-71.

Time not available for special examination at present but might be worth visit if in area. Have Grover order topo maps.
