The following file is part of the Grover Heinrichs Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

August 22, 1973

Mr. A.G. Hatsis
Toledo Mining Company
322 Newhouse Building
Salt Lake City, Utah 84111

Dear Mr. Hatsis:

This letter is to notify you that Essex International, Inc. does not desire to continue its exploration program on your Frisco #1 through #48, Hub #1 through #44, and Lucky #15, #17, and #19 through #46 claims as described in Exhibit A of the Agreement with Toledo Mining Company dated December 11, 1971, and it is hereby requested that the above claims be deleted from the provisions of the Agreement, all other provisions, however, to remain unchanged. We will be happy to execute a disclaimer of interest as to the above described claims to clear the record title to any interest of Essex should you so desire.

Since entering into the Agreement, Essex International, Inc. has conducted quite an extensive exploration program and expended a very considerable sum in the analysis of these claims, but has not found mineralization that could be classified as commercial under present circumstances. We also feel that funds that would otherwise be spent on the claims could be more beneficially applied to the analysis and development of contiguous property to yours.

Assessment work for the assessment year ending September 1, 1973, has been completed and we will record affidavits to this effect in the near future.

We are, at the present time, compiling a file containing copies of information developed concerning the above claims, which file will be forwarded to you shortly.

Mr. A.G. Hatsis
Toledo Mining Company
Salt Lake City, Utah

August 22, 1973

Re: Lucky Hub Group
Milford, Utah

Dear Mr. Sheridan:

At the present time we are planning our assessment work for 1973. After evaluation of the surface exposures and available airo-magnetic data, it is difficult to locate a justifiable target for work on the Lucky Hub group.

For assessment years 1970 and 1971 you report geophysical work being performed on this group but we have never received the results of this work. If you could forward the data to us, the information might help us to arrive at a favorable evaluation of the property.

Very truly yours,

Paul I. Eimon
Manager of Exploration
