The following file is part of the John E. Kinnison mining collection

#### **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

#### **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

#### **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Mr. Robert Daniel  
610 26th Road  
Grand Junction, Colorado

Blind Subject: San Simon Copper  
Graham County, Arizona

Dear Mr. Daniel:

On December 10, I examined your San Simon copper prospect. I did not find the geologic environment suggestive of a porphyry copper deposit, and thus regret to advise you that we will take no further action with respect to your property.

However, I wish to thank you for bringing your prospect to our attention, and wish you success in locating future properties.

Sincerely,

Melville See  
Staff Geologist

MS/bl

b.c.c. J. J. Durek  
File  
Blue

Blind Note: The property was submitted as a porphyry copper prospect. Reportedly, a granite porphyry had intruded a granite diorite, producing a radial fracture pattern. Field examination revealed only a pre-Cambrian granite with no evidence of copper mineralization.

Grand Junction, Colorado

Blind Subject: San Simon Copper  
Prospect, Graham County, Arizona

Dear Mr. Daniel:

This is just a short note to advise you that I will be in the Safford vicinity within the next week or so, and will schedule a brief visit to your San Simon copper deposit, south of Safford. Incidentally, I wish to thank you again for your kindness in providing an airplane and pilot to examine the deposit from the air.

I will be in touch with you following the examination, and advise you at that time of our future intention regarding the property. I wish to thank you for your effort in our behalf, and for bringing the property to our attention.

Yours very truly,

John E. Kinnison  
Regional Geologist

JEK/bl

b.c.c. Dr. T. F. O'Neill  
File  
Blue

Blind Note: Daniel is a former geologist turned promoter, principally in uranium. The San Simon property did not appear particularly attractive from the air, but he has mapped an interesting ring-shaped set of fractures, with a few scattered geochemical molybdenum values which are interesting. The property is low priority, but will be worked in conjunction with another examination planned for this area.
