ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Mr. James M. Gough
Gough Mining Prospects
4601 Evergreen Drive
Sierra Vista, Arizona 85635

Dear Mr. Gough:

Your recent letter to Dr. P. O. Sandvik, our Chief Geologist, regarding the Golden Star Mine and the Gough Mine has been referred to my attention.

Inasmuch as I frequently travel to Arizona, I will try to gather more information on these particular mines and if they appear to be of interest to IMC, I will contact you at that time.

Thank you for thinking of IMC.

Very truly yours,

J. Bruce Imswiler
Manager of Exploration
Western U.S.A.

Subject _____

To: IMC

Att; Chief Geologist
Mining Department

Dear Sir;

I am a independant prospector and at the present time I have two very good mines. I am willing to accept a suitable settlement, such as a finders fee, or the sale of the mineral rights.

The Golden Star Mine in located in the Arivaca mining district about four miles north of Arivaca in Pima County, Arizona. It is, also in the Las Guijas Mountains and I believe it is in section 8, Range R. 9E T. 20 S, very easy to get to.

The last assay showed Gold ozs. per ton 1.75, Silver ozs. per ton 1 4/10, there is copper, but I never bothered to have an assay of the copper.

The other mine is known as The Gough Mine, it is located in the Santa Teresa Mountains, in Graham County, Arizona. The mine is in the Aravaipa mining district, about 1/2 mile from Landsman Camp in a East-Southeast direction from Landsman Camp and on the Southeast quarter section of section 29, R 20 E. T 5 S at the upper fork of Tule Canyon.

The last assay showed Gold trace, Silver trace, Lead 0.21 and Iron 69.79. The Iron ore is hematate and I have taken samples to a Professor of Geology at the University of Arizona. He told me that there should be pockets of Gold underneath the Iron at perhaps 100 to 1000 ft. underground. I did have three claims in this same area, but I decided to just hold unto one. I personally believe there is a hundred million tons or more of this high grade Iron ore right where I have located.

The Gough Mine is not easy to find, so if your company might be interested, I would be willing to guide you to the Golden Star or to The Gough Mine.

I would consider leasing, especially the Iron ore deposit.

Very truly yours,

James M. Gough
