The following file is part of the Cambior Exploration USA Inc. records

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Knight Prospect:

Location: sec.25, T14S,R2E (32 12',112 07'); Quijotoa Mtns 15'

Anaconda March 11, 1952: 2 mi.N from Covered Wells Trading Post, 48 mi. East of Ajo on Hwy 86.

Development: 10' shaft, 20 mi. of Padres-Hester Project

- Alluvium covered valley floor, occasional rhyolite knolls, E-W trending granite 2 mi. to the North
- Mineralized zone 700'X100', weak copper carbonate staining, fine diss. chalcocite in fine grained rhyolite (?); Small outcrops of Ls and SS occurring as narrow NW striking zones
- Very little alteration in mineralized zone
- Map included

Padres Hester, Sells, Pima County

- D.H. drilled in 1952, depth 710 ft (Bearing NE, -45): Drilled below test pits and cuts showing Copper Ox. and chalcocite at surface; no copper min. intersected
- Hematite-siderite altn on surface, no intense altn
- This D.H. located 1750 ft North of DDH-1
