The following file is part of the Cambior Exploration USA Inc. records

#### **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

#### **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

#### **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

**Prospect and Submittal Report**

Date: \_\_\_\_\_

Property Name: CHINO VALLEY Peb Conglomerate

Township: 16N

County, State: Yavapai County, Arizona

Range: 1W

Date Examined: \_\_\_\_\_ By: \_\_\_\_\_

Section: 5,6

Reply and Date: \_\_\_\_\_

Quadrangle Name: Chino Valley N.

AMS Sheet: \_\_\_\_\_

Summary, Conclusions, Actions Recommended While our sampling has not found appreciable Au, a thorough program of sampling is recommended due to favorable geologic environment.

Location and Accessibility Good to poor unpaved ranch roads.

Owners and Intermediaries, Address, Phone, Zip \_\_\_\_\_

Property Description, Status \_\_\_\_\_

Terms \_\_\_\_\_

Previous Exploration and Production None

General Geology Series of moderately dipping Peb-age conglomerates

Geology of Prospect\* Conglomerates interbedded with micaceous schists, hematitic ss and shale. Matrix of conglomerates is v.fm. grned hematitic clays. No evidence of sulfides. Peb-X or Y

Mineralization\* (Primary and Secondary) Abundant hematite in matrix; no evidence of sulfides.

Geochem Results No Au in the samples taken - NO RECORD of samples

Exploration Recommended Needs more thorough sampling.

Attachments Map

References None

\* Attach geologic map, sketch or otherwise, including examiner's observations with emphasis on mineralization and alteration and their relationships to other geological features. Other desirable attachments: Location map, property map, sample results, etc.
