James Doyle Sell Mining Collection

### **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

### **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

### **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

TO: W. E. Saegart

FROM: Don Hedrick

SUBJECT: Progress Report, September, 1970  
Superior East Project, Pinal Co., Az.

During the month of September, the road work on the Kay claims was continued. Drilling and blasting was done to arrive at location for validating the Kay claims. This work was completed on September 21 at which time the compressor and jack hammer was returned to Tucson. The D-7 Cat was used to move equipment to each location for drilling with an air-track and a 600 c.f.m. compressor.

Equipment for validating the Superior East claims was moved onto location by A. A. McDaniel Well and Machine Company September 1, and drilling began on the Dacite claims. Twenty-four holes, aggregating 1,780', were drilled. Air-track validation drilling was completed September 25.

Harvey Smith, mining engineer, began drilling the Kay claims with a portable drill on August 24. A total of 38 claims were drilled consisting of a 10' hole on each, Kay 93-110 and Kay 44-63. This work was completed September 28. Paper work and posts of each claim will be done by Mr. Smith also. Maps and locations will be submitted by Mr. Smith later on.

Jack Aneas Construction Company of Globe, Arizona was finished with road work and moving equipment to drill sites September 12. Because of heavy rains, some of the work had to be done again. Roads were washed out. This was done by A. A. McDaniel Well and Machine Company.

The claims validated by air-track drilling were recorded at the County seat on September 25. Posts and papering of claims have been put on the drill sites.

Attached to this report is a list of drill holes done by the air-track, the dates on which they were drilled, total depth of feet of each hole, and the claims in which they validate. Following later, when the work is completed, a list of drill holes and the dates of validation done by Harvey Smith will be added. Maps will be included.

Don Hedrick

Dear Sir:

Enclosed herewith is a copy of the recorded Notice of Abandonment of the Kay No's. 155 - 170, unpatented mining claims which had been staked over your Ghost claims.

It is my understanding that we have also removed our papers from these claims.

Yours very truly,
