ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Re: Sale of Meyer Resources Assets

Dear Mr. Vikre:

Enclosed, please find a package detailing the assets of Meyer Resources. Meyer has decided to sell all assets and withdraw from the mining business. Our assets include properties (in various stages of exploration), complete assay lab, both portable and stationary, and three R.C. drill rigs and support equipment.

If you have any interest in our assets, please call and we will provide you with further information. Thank you for your time.

Sincerely,

L. Duane McPherson, V.P. & General Manager

DOME ROCK PROPERTY

LA PAZ COUNTY, ARIZONA

The 278 MCL lode and other lode and placer claims plus 8 leased placer claims are in the Dome Rock Mountains just west of Quartzite. The leased placer claims are all within the same lease agreement with a payment due on March 1, 1991. The claims are just north of Interstate 10 and are accessed from the Dome Rock interchange. Bedrock is generally Precambrian gneisses and schists, and there are younger diorite and quartz monzonite intrusive rocks. The area shows a very strong north 30 west structural fabric. Initial interest in the project was generated by the presence of placer gold workings in some of the gullies. An unsuccessful attempt was made to conduct placer operations on the property. A very preliminary mapping and sampling program was initiated by Meyer, and some zones with quite high gold values were located. Samples from the southwest area of the project, Silica Ridge, contained 0.04 - 0.07 oz Au/ton, and one copper-bearing vein contained 0.495 oz Au/ton. The Silica Ridge area is a silicified zone occurring between schist and diorite. Nine RC holes were drilled on the property, and holes 90-1 through 90-6 tested the Silica Ridge zone. Significant gold values were not found in the drill holes. Holes 90-7,8, and 9 were in strongly altered rock which contained gold values in the 0.00X range.
