James Doyle Sell Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

SUPERIOR EAST PROJECT
UNAUTHORIZED VISITORS

During the past few days a number of unauthorized people have been present on both drill sites. No one should be allowed on the site unless he is an employee of ASARCO, an employee of the contractor in charge, or a supplier of materials for the contractor. All others should be asked to leave.

In addition, no information such as hole depth, appearance of the rock, or rock type, is to be divulged to ANYONE OTHER THAN ASARCO personnel.

Mr. Rene' G. von Boeck
Assistant Chief Exploration Geologist
Inspiration Consolidated Copper Company
Inspiration, Arizona 85537

Dear Rene':

Your letter of July 1, arrived to confirm the authorization that Asarco may continue to probe the Old Miami Copper Drill Hole north of Sutton Summit.

We are still in the process of inquiring into various ways to approach the problem, but, as you request, we will notify your office prior to moving on another rig. It is further understood that no probing will be done below the depth of the old hole - - - which we understand to be 4011 feet, without further written agreements between ICC and Asarco.

Sincerely,

A handwritten signature in cursive script, reading "James D. Sell".

Dear Jim:

This is to notify you of the authorization given you via telephone for Asarco to continue probing the Old Miami Copper Drill hole with any drilling equipment you feel will do the job. This authorization is given with the understanding that no drilling will be done beyond the bottom of the hole without a signed agreement.

As also discussed with you, Asarco will notify this office when continuation of the probing begins.

Sincerely yours,

Rene G. von Boeck
Asst. Chief Exploration Geologist

Mr. Hugh W. Olmstead
Chief Exploration Geologist
Inspiration Consolidated Copper Co.
Inspiration, Arizona 85537

Dear Mr. Olmstead:

As we mutually agreed upon, ASARCO has re-occupied drill site DCA-1 located on your Ghost Group of mines. The approximate location of DCA-1 is NW/NE of Section 3, T1S, R13E, G&SRB&M.

We have now determined that casing can be placed to or near the original depth of the hole. We also mutually agreed that ASARCO will have the right but not the obligation, at its expense, to deepen this hole by diamond drilling with the following understandings and agreements:

1. Any mineral discovery made by ASARCO in the deepening of this hole will be for the exclusive benefit of Inspiration Consolidated Copper Co. provided, however, that ASARCO shall have the right to all geological information obtained from such drilling.
2. Copies of geologic logs and assay data will be given to Inspiration. Also, Inspiration can inspect the drilling at any time and may log the core.

AMERICAN SMELTING AND REFINING COMPANY

By

W. L. Kurtz, Supervisor

The foregoing does meet with our understanding.
