ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Kappes, Cassiday & Associates

1845 Glendale Avenue, Sparks, Nevada 89431
702-356-7107 - Telex 170049 - Fax 702-356-5609

RECEIVED DEC 18 1989

15 December 1989

A.F. Budge Mining Ltd.
4301 N. 75th Street
Suite 101
Scottsdale, Arizona 85251

Attention: Carole O'Brien

Subject: Dore' Bars V-257 through V-264

The receipt and sampling of eight dore' bars was witnessed on 5 December 1989 by a representative of Kappes, Cassiday and Associates at G.D. Resources in Sparks, Nevada.

The eight bars were received in two packages. The packages were opened and each of the bars was weighed. Bars V-257 through V-260 were labeled with a piece of tape around each bar, with the bar number written on the tape rather than stamped on the bar. The following weights were recorded:

<u>BAR</u>	<u>WEIGHT grams</u>
V-257	1456.8
V-258	1559.4
V-259	2408.9
V-260	1751.0
V-261	1187.8
V-262	1822.9
V-263	3885.5
V-264	2615.5
 TOTAL BEFORE MELT WEIGHT:	 16687.8

The eight bars were melted down in a furnace and two bars were poured. Two dip samples were taken of the melt. A portion of the dip samples weighing 2.2 grams was taken for the client. The remaining 18.1 grams of the dip samples was added back into the total bar weight below. Bars V-257 and V-263 each had a thin layer of what appeared to be iron on the top of each bar which was included in the before melt weight. After the bars had cooled down and the slag was chipped off a magnet was held to each bar. Both bars were attracted by the magnet. After talking with Dale Allen of A.F. Budge by phone, 50.0 grams was subtracted from the after melt weight of the bars to account for the iron content.

The following weights were obtained:

<u>DESCRIPTION</u>	<u>WEIGHT grams</u>
Bars	16455.9
G.D. Dip Sample	3.1
Umpire Dip Sample	15.0
Approx. Wt. Iron	(50.0)
TOTAL BAR WEIGHT:	16424.0
KCA Dip Sample	2.2
TOTAL AFTER MELT WEIGHT:	16426.2

The 2.2 gram sample was taken by KCA and shipped to Silver Valley Lab in Kellogg, Idaho for assay. The results of the assays by Silver Valley were 12.745% gold and 36.85% silver (KCA sample no. 11307 - December 12, 1989).

Attached is the original GD Resources collection note # 00941 and a copy of the assay results from Silver Valley Lab.

Attention: Carole O'Brien

Subject: Dore' Bars V-270, V-271 and V-273

The receipt and sampling of three dore' bars was witnessed on 2 January 1990 by a representative of Kappes, Cassiday and Associates at G.D. Resources in Sparks, Nevada.

The three bars were received in one packages. The package was opened and each of the bars was weighed. The following weights were recorded:

<u>BAR</u>	<u>WEIGHT grams</u>
V-270	1973.2
V-271	2019.9
V-273	1961.3

TOTAL BEFORE MELT WEIGHT: 5954.4

A.F. Budge Mining Ltd.
17 January 1990 - page 2

The three bars were melted down in a furnace and one bar was poured. A dip sample was taken of the melt. A portion of the dip samples weighing 2.8 grams was taken for the client. The remaining 8.7 grams of the dip sample was added back into the total bar weight below.

The following weights were obtained:

<u>DESCRIPTION</u>	<u>WEIGHT grams</u>
Bar	5884.0
G.D. Dip Sample	3.8
Umpire Dip Sample	4.9
TOTAL BAR WEIGHT:	5892.7
KCA Dip Sample	2.8
TOTAL AFTER MELT WEIGHT:	5895.5

The 2.8 gram sample was taken by KCA and shipped to Silver Valley Lab in Kellogg, Idaho for assay. The results of the assays by Silver Valley were 13.275% gold and 37.69% silver (KCA sample no. 11313 - January 8, 1990).

Attached is the original GD Resources collection note # 00959 and a copy of the assay results from Silver Valley Lab.

Subject: Dore' Bars V-273 thru V-276, V-177, V-278 & V-279

The receipt and sampling of seven dore' bars was witnessed on 11 January 1990 by a representative of Kappes, Cassiday and Associates at G.D. Resources in Sparks, Nevada. One of the bars was labeled with a 100 series number V-177 and is assumed that it should have been bar V-277.

The seven bars were received in one package. The package was opened and each of the bars was weighed. Three of the bars, V-177, V-278 and V-279 contained pieces of iron on top of the bars. The pieces of iron could not be removed prior to melting and are included in the before melt weight. The following weights were recorded:

<u>BAR</u>	<u>WEIGHT grams</u>
V-273	836.2
V-274	755.0
V-275	2837.3
V-276	1057.6
V-177	1358.5
V-278	1219.6
V-279	1642.6
 TOTAL BEFORE MELT WEIGHT:	 9706.8

306.86 t. oz.

34.875 gold
107.28 silver

\$13973.16

Feb. 6

The seven bars were melted down in a furnace and one bar was poured. Two dip samples were taken of the melt. A portion of the dip samples weighing 2.2 grams was taken for the client. The remaining 14.8 grams of the dip samples was added back into the total bar weight below. After the bar was weighed it was checked with a magnet and was not magnetic.

The following weights were obtained:

<u>DESCRIPTION</u>	<u>WEIGHT grams</u>
Bar	9529.5
G.D. Dip Sample	3.5
Umpire Dip Sample	11.3
TOTAL BAR WEIGHT:	9544.3
KCA Dip Sample	2.2
TOTAL AFTER MELT WEIGHT:	9546.5

The 2.2 gram sample was taken by KCA and shipped to Silver Valley Lab in Kellogg, Idaho for assay. The results of the assays by Silver Valley were 11.365% gold and 34.96% silver (KCA sample no. 11314 - January 17, 1990).

Attached is the original GD Resources collection note # 00985 and a copy of the assay results from Silver Valley Lab.

Subject: Dore' Bars V-163 through V-167

The receipt and sampling of five dore' bars was witnessed on 6 September 1989 by a representative of Kappes, Cassiday and Associates at G.D. Resources in Sparks, Nevada.

The five bars were received in one package. The package was opened and each of the five bars was weighed. The following weights were recorded:

<u>BAR</u>	<u>WEIGHT grams</u>
V-163	3174.4
V-164	2687.0
V-165	1998.0
V-166	2406.4
V-167	2153.0

TOTAL BEFORE MELT WEIGHT: 12418.8

The five bars were melted down in a furnace. A dip sample was taken of the melt. A portion of the dip sample weighing 4.6 grams was taken for the client. The remaining 21.5 grams of the dip sample was added back into the total bar weight below. The 4.6 gram sample was taken by KCA and shipped to Silver Valley Lab in Kellogg, Idaho for assay. The results of the assays by Silver Valley were 15.303% gold and 39.03% silver (KCA sample no. 1132 - September 12, 1989).

A.F. Budge Mining Ltd.
15 September 1989 - page 2

The melt was poured into one bar and allowed to cool. When cool, the slag was chipped off and the bar was weighed. The slag was collected, labeled and saved. The following weights were obtained:

<u>DESCRIPTION</u>	<u>WEIGHT grams</u>
Bar	12357.1
G.D. Dip Sample	5.2
Umpire Dip Sample	16.3
TOTAL BAR WEIGHT:	12378.6
KCA Dip Sample	4.6
TOTAL AFTER MELT WEIGHT:	12383.2

Attached is the original GD Resources collection note # 00846 and a copy of the assay results from Silver Valley Lab.

CONTRACT BETWEEN GD RESOURCES INC.

AND

A.F. BUDGE (MINING) LIMITED

1. CLASSIFICATION OF MATERIAL

CLASS : Class Miscellaneous, **IMPURE DORE**
GRADE : 5% - 12% Au 30% Pb 34% Cu
 15% - 50% Ag 5% Zn
AMOUNT : 14 bars, approximately 1,000 ounces total weight

2. CHARGES

PLAN 2 : TREATMENT CHARGE PLUS METAL ACCOUNTABILITY BASED ON RECOVERY

1. Treatment Charge

\$500.00 minimum charge.

2. Accountability

Based on recovered dore and settlement bullion assay.

Gold

97.75% return.

Silver

97.0% return.

No other deductions.

3. METHOD OF PAYMENT

Payment to **BUDGE** in the form of a net check (less GD costs) will be made 15 working days from the date of settlement assay.

4. MASS DETERMINATION AND METAL CONTENT (SETTLEMENT ASSAY)

The material will be weighed on a certified scale in the presence of a representative(s) of **BUDGE** and GD and the net weight recorded on GD's official receipt which will be accepted by both parties as final and binding.

GD will first cupel and then smelt the material and endeavor to recover the maximum amount of precious metal from the material. A representative(s) of **BUDGE** will be present during the processing period, if requested.

Vacuum tube samples will be taken from the dore for assay and will be divided into 3 samples. In the first instance, two samples will be assayed, one each by **BUDGE** and GD. If the assays of the dore are within the following tolerances, then the exact mean of the two assays will be taken:

Gold 0.25%
Silver 0.50%

If the assays fall outside these tolerances then a mutually acceptable Umpire Assayer will be used. Under such conditions the middle value of the three assays (GD, **BUDGE** and Umpire will be used). The party whose assay is furthest from the umpire assay shall pay the umpire costs.

5. **METAL PRICE FIXING**

Gold : London Bullion Market, afternoon price fix.
Silver : Handy and Harman, New York quotation.

Prices will be fixed on the day following settlement bullion assay.

6. **DELIVERY OF MATERIAL**

Material is accepted F.O.B. the refinery with **BUDGE** to pay all transportation and insurance costs.

All containers must have chemical markings blacked out or otherwise removed.

7. **OTHER TERMS**

See Standard Refining Terms.

Terms stated in this contract supercede those stated in the Standard Refining Terms.

Accepted this 11th day of November 1988.

CONTRACT BETWEEN GD RESOURCES INC.
AND
A.F. BUDGE (MINING) LIMITED

1. CLASSIFICATION OF MATERIAL

CLASS : Class C, ZINC PRECIPITATE
GRADE : 3% - 5% Au
 10% - 25% Ag
AMOUNT : Approximately 50 lbs. per week

2. CHARGES

PLAN 1 : TREATMENT CHARGE PLUS METAL ACCOUNTABILITY

1. Processing Charge

Minimum \$500.00 per lot or \$2.75 per pound received.

2. Metal Accountability

Based on Settlement Assay.

Gold

Less than 30 ozs. recovered	97.5% return
More than 30 ozs. recovered	97.75% return

Silver

Less than 100 ozs. recovered	96.5% return
More than 100 ozs. recovered	97.0% return

A penalty clause for excess **Mercury** will apply based on the attached schedule.

No other deductions.

3. METHOD OF PAYMENT

Payment to **BUDGE** in the form of a GD check (less GD costs) will be made 15 working days from the date of settlement assay.

4. MASS DETERMINATION AND METAL CONTENT (SETTLEMENT ASSAY)

The material will be weighed on a certified scale in the presence of a representative(s) of **BUDGE**. Samples will be assayed by both GD Resources and **BUDGE** and a settlement assay reached based on a 2% tolerance. If the assays cannot be agreed upon, then an umpire assayer will be used to reach the settlement assay.

See Section 4, Standard Refining Terms for complete details.

5. METAL PRICE FIXING

Gold : London Bullion Market, afternoon price fix.
Silver : Handy and Harman, New York quotation.

Prices will be fixed on the first day of trading following the settlement assay.

6. DELIVERY OF MATERIAL

Material is accepted F.O.B. the refinery with BUDGE to pay all transportation and insurance costs.

All containers must have chemical markings blacked out or otherwise removed.

7. OTHER TERMS

Please see Standard Refining Terms (attached).

The above quotation supercedes the relative terms contained in the Standard Refining Terms.

Dear Dale,

It was a pleasure meeting with yourself and Ron Short at the Elko Conference last week. Attached are the following proposals to treat the materials that we discussed:

1. Impure Dore Processing, approximately 1,000 ozs.
2. Run-of-Mine Zinc Precipitate, approximately 50 lbs. per week

The costs of treating the Impure Dore is somewhat higher than we discussed due to costs of reagents being significantly higher than my original estimate.

Should the proposals be acceptable, I will mail two originals for signatures and we can arrange a specific date for treatment of the dore.

If there are any questions please call me.

Yours sincerely,

Steve Kay

CONTRACT BETWEEN GD RESOURCES INC.

AND

A.F. BUDGE (MINING) LIMITED

1. CLASSIFICATION OF MATERIAL

CLASS : Class C, ZINC PRECIPITATE
GRADE : 3% - 5% Au
 10% - 25% Ag
AMOUNT : Approximately 50 lbs. per week

2. CHARGES

PLAN 1 : TREATMENT CHARGE PLUS METAL ACCOUNTABILITY

1. Processing Charge

Minimum \$500.00 per lot or \$2.75 per pound received.

2. Metal Accountability

Based on Settlement Assay.

Gold

Less than 30 ozs. recovered	97.5% return
More than 30 ozs. recovered	97.75% return

Silver

Less than 100 ozs. recovered	96.5% return
More than 100 ozs. recovered	97.0% return

A penalty clause for excess Mercury will apply based on the attached schedule.

No other deductions.

3. METHOD OF PAYMENT

Payment to BUDGE in the form of a GD check (less GD costs) will be made 15 working days from the date of settlement assay.

4. MASS DETERMINATION AND METAL CONTENT (SETTLEMENT ASSAY)

The material will be weighed on a certified scale in the presence of a representative(s) of BUDGE. Samples will be assayed by both GD Resources and BUDGE and a settlement assay reached based on a 2% tolerance. If the assays cannot be agreed upon, then an umpire assayer will be used to reach the settlement assay.

See Section 4, Standard Refining Terms for complete details.

5. METAL PRICE FIXING

Gold : London Bullion Market, afternoon price fix.
Silver : Handy and Harman, New York quotation.

Prices will be fixed on the first day of trading following the settlement assay.

6. DELIVERY OF MATERIAL

Material is accepted F.O.B. the refinery with BUDGE to pay all transportation and insurance costs.

All containers must have chemical markings blacked out or otherwise removed.

7. OTHER TERMS

Please see Standard Refining Terms (attached).

The above quotation supercedes the relative terms contained in the Standard Refining Terms.

Accepted this _____ day of _____ 19____.

FAX (702) 358-9275

PRECIOUS METAL REFINERY

Ideally situated in Sparks, Nevada, this state-of-the-art refinery offers the following services to the mining and other precious metal users and producers in the United States:

- * Pyrometallurgical, and limited hydrometallurgical, recovery of gold and silver from all types of precious metal bearing scrap material.
- * Specialists in processing loaded and scrap carbons (coarse, fine and sludges), refinery slags, concentrates, precipitates, furnace refractories and crucibles.
- * Batch processing for high grade material e.g. slags, zinc precipitates and concentrates.
- * Precious metal purchased or toll processed and returned to client.
- * Processing of jewelry and dental scrap.
- * Refining of dore to 995+ fine Au and 980+ Ag or 999+ Ag.
- * In-house assay laboratory to expedite analytical work and for custom bullion assays.

GD Resources wishes to stress that it is open to all types of customers, from the large mining corporations, to the small miner and the man-in-the-street, and we are willing to negotiate on all facets of our refinery terms, so please call us!

Directors: H.V. Zipprich (President), S.J. Kay (Vice President/Marketing, Secretary)
M.H. Olwyn (Treasurer), K.P. McNamara (Vice President/Production, Asst. Secretary)

BACKGROUND INFORMATION

GD Resources, Inc. has strong roots in the industry with its parent company, **Orion Refiners Ltd.**, operating a hydrometallurgical refinery (for gold, silver and PGM recovery) near **London, England**, and a precious metal trading and high-tech crystal growing operation near **Zurich, Switzerland**. Its associated international company, **Golden Dumps Research (Pty) Ltd.**, has operated a hydro- and pyrometallurgical refinery since 1979, the latter being one of the largest independent refineries in Africa.

The company brings to the US refinery industry a wealth of expertise in the processing of **all types of precious metal scrap material**, ranging from jewelry and dental scrap to loaded and scrap carbons (coarse, fine and sludges) refinery slags, calcines, precipitates, black sands and concentrates from the gold mining industry. In addition we offer limited dore refining facilities to produce 995+ fine gold and either 980+ silver or 999+ fine silver.

Platinum-group bearing scrap is presently shipped to our affiliate in the United Kingdom, but a platinum refining facility is planned for Sparks in the future.

GD has the added flexibility, unavailable at other refineries, of processing high grade material (slag, precipitates and concentrates) on a batch basis using a furnace bowl dedicated to the client's material.

In addition to the **Refinery**, GD Resources also offers a full-service **Analytical Lab** specializing in state-of-the-art sample preparation techniques, 3 - 5 day turnaround time for normal samples, custom bullion assays and highly competitive prices. We also supply high quality, coconut-shell based **Activated Carbon** to the gold mining industry at very competitive prices. GD Resources, through its international affiliates, is also one of the leaders in **Bioleach Technology** for the treatment of refractory gold ores.

TREATMENT CHARGES

Treatment charges will vary dependent upon the type, grade and volume of material, but would generally be in the following ranges:

<u>CLASS</u>	<u>TYPE</u>	<u>TREATMENT COST</u> <u>PER TON (2,000 lbs.)</u>	<u>METAL ACCOUNTABILITY</u> <u>(% RETURN)</u>
A	Loaded and scrap carbons (coarse, fine and sludges)	\$ 850 - \$ 950	90 - 97% Au 75 - 90% Ag
B	Refinery slags	\$1,000 - \$1,250	90 - 98% Au 75 - 95% Ag
C	Calcines, concentrates, zinc precipitates	\$2,700 - \$3,150	90 - 98% Au 75 - 95% Ag
D	Crucibles, furnace liners	\$2,700 - \$3,150	90 - 95%
E	Dental and jewelry scrap, amalgams	upon request	85 - 95%
F	High-grade black sands	\$5,500 - \$6,000	100% recovered metal

* See Appendix C for Standard Refining Terms *

CLASSIFICATION OF MATERIALS

Material for treatment is sub-divided into 5 main categories dependent upon the type, cost and processing method required to treat that material:

CLASS A : Loaded and scrap carbons (coarse, fine and sludges)

CLASS B : Refinery slags

CLASS C : Calcines, concentrates and zinc precipitates

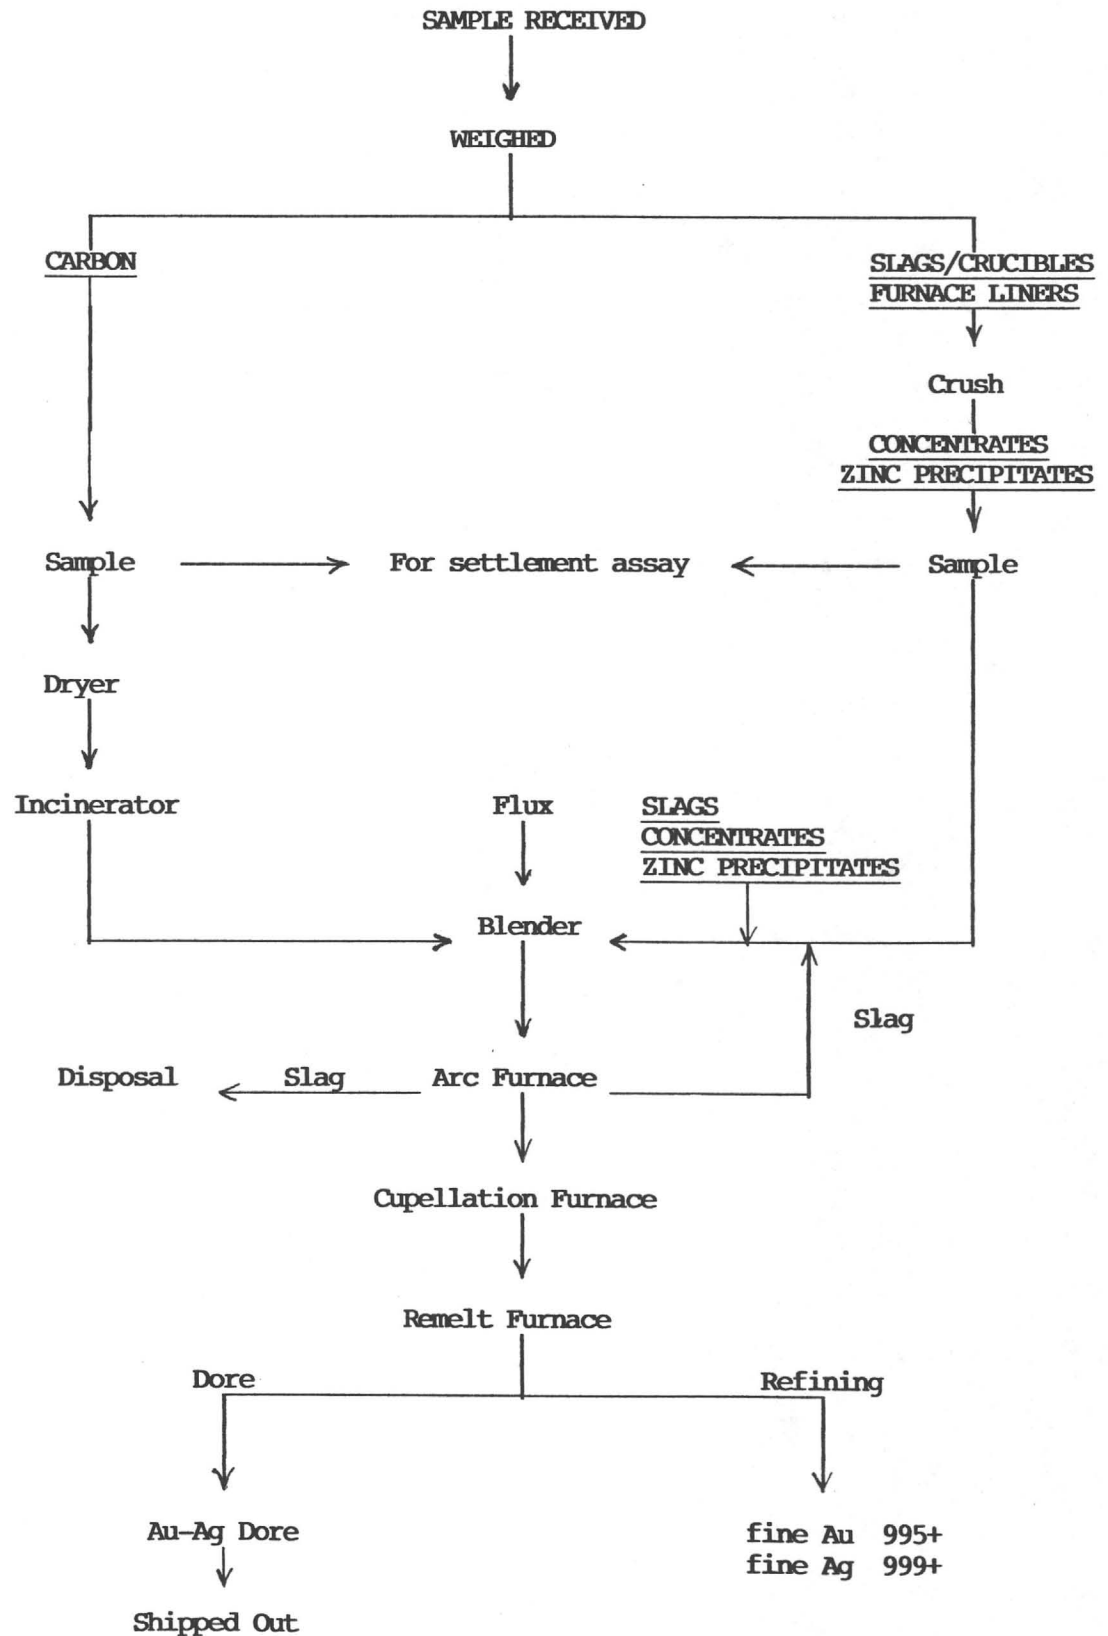

CLASS D : Crucibles and furnace liners

CLASS E : Dental and jewelry scrap, amalgams

CLASS F : Black sands

Typical flow sheets for the above materials are shown in Appendix A and B.

APPENDIX C
STANDARD REFINING TERMS

(1) CLASSIFICATION OF MATERIALS

<u>CLASS</u>	<u>METAL(S) RECOVERED</u>	<u>TYPE OF MATERIAL</u>
A	Gold and/or Silver	Loaded and scrap carbon (coarse, fine and sludges)
B	Gold and/or Silver	Refinery slags
C	Gold and/or Silver	Calcines, concentrates and zinc precipitates
D	Gold and/or Silver	Crucibles and furnace liners
E	Gold and/or Silver	Dental scrap, jewelry scrap, jewelers sweeps, filings and alloys, amalgams
F	Gold and/or Silver	Black sands

(2) CHARGES

CLASSES A, B, C, AND D

GD Resources ("GD") has three basic plans available. The Client may choose either plan at the time of signing of the refining contract. Combination(s) of plans are available upon request.

PLAN 1 TREATMENT CHARGE PLUS METAL ACCOUNTABILITY BASED ON ASSAY

A flat-rate treatment charge per short ton (or fractions thereof) plus a percentage return of precious metal (metal accountability) based on the Settlement Assay and mass determination as set forth in Section 4 (A).

PLAN 2 TREATMENT CHARGE PLUS METAL ACCOUNTABILITY BASED ON METAL RECOVERY

As above but settlement based on assay of dore recovered from smelting as set forth in Section 4 (B).

PLAN 3 METAL ACCOUNTABILITY ONLY

GD will charge a fixed percentage of metal content and incur all processing charges.

Settlement assay and mass determination will be determined as set forth in Section 4, either A or B.

CLASSES E AND F

Because of the difficulty of accurately estimating grades of this material, only Plan 2 or 3 is available based on assay of the recovered dore.

For all three Plans a dore return to the client is possible (except for carbon) or a transfer of contained ounces to a designated account; both of which will incur a small transfer fee to be mutually agreed upon.

The foregoing options of the Client are subject to the following conditions:

- (a) Material assaying less than 5 oz/t gold equivalent will be treated only on the basis of Plan 1.
- (b) Slags assaying greater than 30 oz/t gold or with visible metal prills will be treated only on a recovered metal basis and not on assay content (Plan 2 or 3).
- (c) Dore return is **not** possible for carbon processing.
- (d) Minimum charges per consignment apply to all 3 classes of material.

(3) METHOD OF PAYMENT

The method and manner of payment will be agreed upon at the time of signing of the contract between GD and the Client. All prices quoted shall be U.S. dollars. Ounces shall refer to Troy ounces (31.103 grams) and tons shall refer to short tons (2000 avoirdupois pounds, where 1 avoirdupois pound equals 453.59 grams).

(a) Payment by GD to Client

Payment is generally in the form of a GD check and shall be made within 30 - 45 days of the date of settlement assay (10 - 15 days for Class E) as specified in the contract.

If requested by Client payment can be by certified check, bank draft or wire transfer, at the expense of the Client; transfer of ounces to the clients account will incur a small percentage transfer fee.

All dore returns will be F.O.B. Sparks with the Client to arrange transport, insurance and pick-up. GD will bear the risk of loss only during the period that the material is in the actual possession of GD.

(b) Payment by Client to GD

Generally, GD's costs will be deducted from the final settlement and a net check issued to the client.

In the case of a dore return to the client, GD's costs will be invoiced, due and payable upon receipt.

In the case of a transfer of ounces, costs can either be deducted before transfer, or the total amount of contained ounces can be transferred and the client billed for GD's costs, including a mutually agreed upon transfer fee. One of the above options will be specified in the contract.

(4) MASS DETERMINATION AND METAL CONTENT

TWO OPTIONS ARE AVAILABLE:

(a) BASED ON SETTLEMENT ASSAY

The material will be weighed on a certified scale and sampled in the presence of representatives of GD and the Client.

Four samples will be taken for analysis of metal content and moisture content (where applicable). Normally two samples will be retained by GD and two by the Client.

The dry mass (where applicable) of the material will be calculated and declared in short-tons and recorded on the GD's official receipt which shall be accepted by both parties as final and binding.

In the first instance two of the four samples will be analyzed for precious metal and moisture content, one by GD and one by the Client. **If the assays deviate by more than 5% then a third sample shall be sent to a mutually acceptable umpire assayer.** Under such conditions the middle (median) value of the three assays (GD's, Client's and Umpire's) will be final and binding and be used as settlement assay to calculate the mass of metal in the material. The party whose assay is furthest from the umpire's assay shall pay the umpire assay costs.

GD shall reserve the right to commence processing the material immediately upon completion of the weighing and sampling procedure described above.

Exchange of assays shall be by telephone, crossed mail or by telefax, as agreed upon by both parties.

(b) BASED ON RECOVERY (BATCH SMELTING)

The material will be weighed on a certified scale in the presence of representative(s) of the client and GD and the gross weight and net weight recorded on GD's official receipt which will be accepted by both parties as final and binding.

GD will smelt the material on a batch basis and endeavor to recover the maximum amount of precious metal from the material. A representative(s) of the client will normally be present during the processing period.

From the recovered dore, vacuum tube samples will be taken for settlement assay. The tube sample will be divided into 3 samples. In the first instance two samples will be assayed, one each by GD and the client. If the assays of the dore are within the following **splitting limits**, then the exact mean of the two assays will be taken:

Gold	0.30%
Silver	0.50%

If the assays fall outside these splitting limits then a mutually acceptable Umpire Assayer will be used. Under such conditions the middle value of the three assays (GD, Client and Umpire) will be used. The party whose assay is furthest from the umpire assay shall pay the umpire assay costs.

GD will endeavor to recover the maximum amount of precious metal from the material and representative(s) of the client may be present at the final weighing of the recovered metal. The official weight recorded on GD's official receipt shall be accepted as final and binding by both parties.

(5) METAL PRICE FIXING

For all Classes of material normally the metal price will be fixed on the day following the settlement assay, or if that day should fall on a weekend or public holiday, then the first day of metal trading on the London Bullion Market following that period.

The following markets will be used to establish the price fixing, unless otherwise agreed upon:

Gold : London Bullion Market,
afternoon price fix.

Silver: Handy and Harman,
New York quotation.

Platinum Group: London Bullion Market,
afternoon price fix.

(6) DELIVERY OF MATERIAL

Material is accepted F.O.B. the refinery with the Client to pay all transportation and insurance costs.

Deliveries of material for refining may be made between 7 a.m. and 5 p.m., Monday through Saturday, with prearranged hours for Sundays and public holidays.

Different classes of material should not be mixed and all bags or drums must be clearly marked, giving the seller's name and nature of the contents.

Before forwarding materials it is the Client's responsibility to obtain from the relevant authorities such permits, licenses or certificates as may be required by law to authorize them to transport such material.

No instrument of receipt given or signed for by GD at the time of delivery shall constitute GD's agreement as to the weight or nature of the delivered material.

(7) PRECIOUS METAL REFINING OF DORE (WHERE APPLICABLE)

Toll refining of dore to produce 995+ fine gold and 980+ and 999+ fine silver will be carried out at the facility in Sparks, and refining of platinum and platinum group materials will be carried out through Orion Refiners in England.

The method and manner of payment differs slightly from that set forth in Section 3 for processing scrap materials. Payment or return of gold and silver will generally be within 10 - 15 working days of receipt of the metal and will be priced on the date of receipt based on the metal markets described in Section 5.

A minimum of 5 ounces of silver in the gold product is required for silver settlement and payment.

Settlement for platinum refining would normally be effected 6 - 12 weeks from the date of receipt, with the price being fixed on the date of receipt of the material and based on the metal markets described in Section 5.

In the event the Client elects to receive precious metals in lieu of cash settlement, then GD may, at its discretion, supply gold in the form of commercial quality 995+ fine gold bars from any other source.

Refining terms are available upon request.

(8) INSURANCE

The Client's insurance shall be in effect up to delivery of material to the refinery at which time the insurance becomes the responsibility of GD until processing and settlement have been completed and payment or precious metal have been delivered to the Client.

(9) INDEMNITY CLAUSE

In the case of **Class A, B, C and D** the official net weight and precious metal content will be based upon the criteria detailed in Section 4.

In the case of **Class E and Class F** (and **Class B** if based on recovered gold) the final amount of metal extracted from the material and weighed in the presence of representatives of GD and Client shall be deemed the accepted metal content extracted. The Client shall have the right of representation during the processing period if specifically requested in writing, but shall not be privy to certain processing methods proprietary to GD Resources. By acceptance of these terms in advance of processing, Client absolutely waives and releases any claims that the amount of metal which could have been extracted from the material, notwithstanding its obligation in Section 4, final paragraph.

Should (a) any particulars of the material given by the Client be inaccurate; or
(b) the delivered material not be free from hazardous material (unless GD has agreed in writing to accept such material); or
(c) the delivered material not be in compliance with all relevant laws regarding transportation of such material (see Section 7); or
(d) the delivered material not be securely packed and marked,

then the Client shall indemnify and hold GD harmless against all loss, damage, costs, penalties and expenses incurred by GD in respect thereto and GD may in its sole discretion, either

- (i) adjust its charges to allow for any and all additional work required together with reimbursement for all such loss, damage, costs, penalties and expenses; or
- (ii) cancel the contract by written notice to Client, in which event Client shall immediately retake possession of the material, with all risks being borne solely by Client.

(10) FORCE MAJEURE

In the event any act of nature, accident, war, labor dispute or any other cause beyond the reasonable control of GD, whether or not foreseeable, prevents or hinders the performance of GD, then GD may suspend its performance during the period of such Force Majeure. The client will be notified in writing by registered mail of the imposition and cessation of Force Majeure.

SAMPLE TO CLIENT - 7.7 gms.

Kappes, Cassiday & Associates

1845 Glendale Avenue, Sparks, Nevada 89431
702-356-7107 - Telex 170049 - Fax 702-356-5609

24 May 1989

A.F. Budge Mining Ltd.
4301 N. 75th Street
Suite 101
Scottsdale, Arizona 85251

Attention: Carole O'Brien

Subject: Dore' Bars V-87 through V-95

The receipt and sampling of nine dore' bars was witnessed on 23 May 1989 by a representative of Kappes, Cassiday and Associates at G.D. Resources.

The nine bars were received in four packages. The packages were opened and weighed. The following weights were recorded:

<u>BAR</u>	<u>WEIGHT grams</u>
V-87	3320.4
V-88	2060.0
V-89	2132.7
V-90	2851.0
V-91	4388.3
V-92	3654.2
V-93	2524.0
V-94	2351.1
V-95	<u>4877.9</u>

TOTAL BEFORE MELT WEIGHT: 28159.6

The nine bars were then melted down in a furnace. A dip sample was taken of the melt. A portion of the dip sample weighing 2.2 grams was taken for the client. The remaining 4.9 grams of the dip sample was added back into the total bar weight below. The 2.2 gram sample was taken to KCA to be shipped to Silver Valley Lab in Kellogg, Idaho.

A.F. Budge Mining Ltd.
24 May 1989 - page 2

The melt was poured into two bars and the new bars were allowed to cool. When cool, the slag was chipped off of the bars and the bars were weighed. The slag was collected, labeled and saved. The following weights were obtained:

<u>BAR</u>	<u>WEIGHT grams</u>
First bar	15550.0
Second bar	<u>12470.5</u>
TOTAL BAR WEIGHT:	28020.5
Dip sample	4.9
TOTAL AFTER MELT WEIGHT:	28025.4
