#### **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

#### **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

#### **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

RE: Notice of Completion - Mining Notice #AZA-26523

Dear Mr. Drew:

This letter is to inform you of the completion of exploration activities at Reynolds Metals' FB claims located in Sec. 19, T20N, R20W and Sec. 24 T20N, R21W in Mohave County.

Exploration drilling of four (4) shallow reverse-circulation drill holes was conducted by Hackworth Drilling, Inc. of Elko, Nevada beginning May 29 and completed June 2, 1992. All holes were drilled wet and immediately plugged as required by the Arizona Department of Water Resources. All drill sites and any new roads were reclaimed on July 29, 1992 by Linn Construction of Kingman, using a D-7 caterpillar tractor.

Reynolds Metals plans no further work under this mining notice and hereby requests a letter from your office indicating closure of this file. The FB claims have been returned to the lease holder Sun River Gold, Inc. from Vancouver, British Columbia, Canada.

As of September 30, 1992 Reynolds' Reno exploration office will be closed for business. I wish to thank you and the entire BLM staff in Kingman for your cooperation and professionalism during the last two years.

Best regards,

A handwritten signature in cursive script that reads "Michael R. Winston". The signature is written in black ink and is positioned above the printed name and title.

Michael R. Winston  
Contract Geologist for Reynolds Metals

Reynold's Metals  
5301 Longley Lane, Suite 157  
Reno, Nevada 89511

Gentlemen:

We have received and reviewed your notice of intent to conduct drilling operations on the FB claim group, located in Township 20 North, Range 20 and 21 West, G&SRM. Your notice has been assigned file number AZA-26523. Please refer to this number when making any inquiries to this office. Your proposed activities are in conformance with Federal regulations concerning surface disturbance, 43 CFR 3809.1-3.

You are reminded that it is up to the operator to take all reasonable measures necessary to prevent undue degradation of Federal lands during operations. Access routes shall be planned to conform to existing terrain, and be planned for minimum width to minimize cut and fill, where practicable. All tailings, dumps, deleterious materials or substances, and other wastes produced by the operation shall be disposed of in accordance with applicable Federal and State laws. Sales of such materials are not allowed in conjunction with mining claims under the 1872 Mining Law. The operator shall, at the earliest feasible time, reclaim the area disturbed, except to the extent necessary to preserve evidence of mineralization, by taking reasonable measures to prevent or control onsite and offsite damage of the Federal lands. Reclamation shall include, but not be limited to:

1. Saving of topsoil for final application after recontouring of the disturbed areas has been completed.
2. Measures to control erosion, landslides, and water runoff.
3. Measures to isolate, remove, or control toxic materials.
4. Reshaping of the topsoil, and revegetation of the disturbed areas.

- 5. Rehabilitation of fisheries and wildlife habitat, where applicable.
- 6. Comply with all Federal, State, and local regulation pertaining to mining activities.

Any change of operator, claimant, or mailing address, shall be promptly reported to this office. Modifications to the Notice shall be submitted to this office for evaluation, and may not be implemented without prior approval by the Authorized Officer.

Approval of this notice will not now, nor in the future, serve as a determination of the ownership or the validity of any mining claims to which it may relate.

You are requested to contact this office with a Notice of Completion following reclamation of the site. It may be to your benefit to contact us during the last stages of reclamation and prior to removing the equipment.

If you have any questions for which we can be of assistance, please call John Thompson, Area Geologist, at (602) 797-3161.

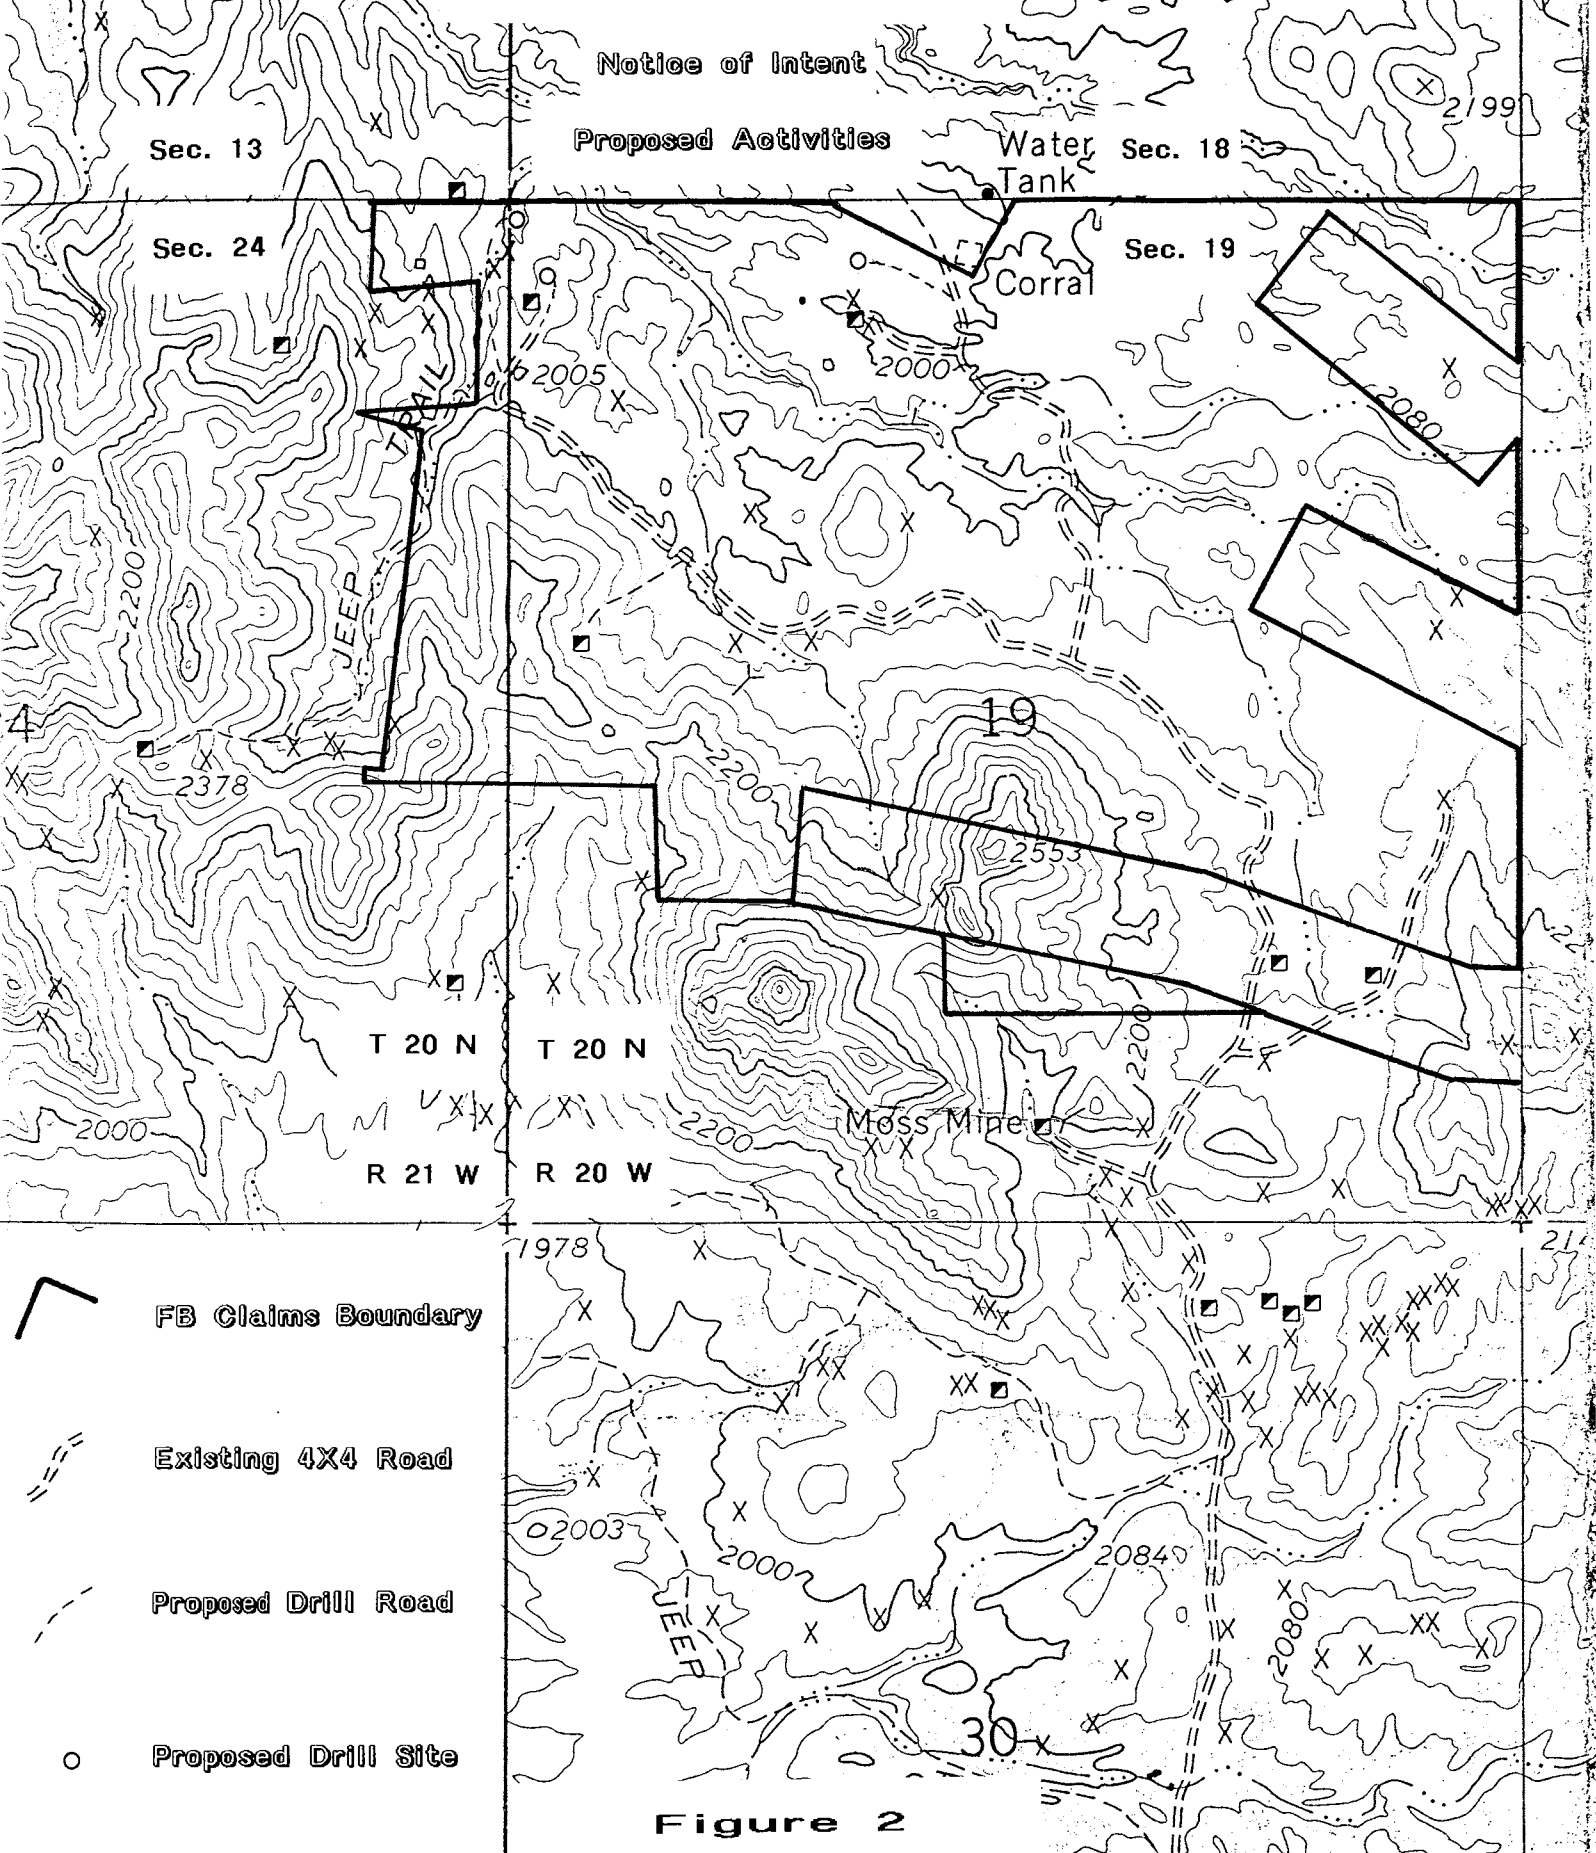

Sincerely,

Ken R. Drew  
Area Manager

Subject: Notice of Intent to Conduct Exploration Activities at the  
FB Prospect in the Oatman Mining District,  
Mohave County, Arizona

To Whom It Concerns:

I am submitting this letter and the enclosed Mining Notice on behalf of Reynolds Metals Exploration, Inc. The enclosed Mining Notice and its attachments are intended to serve as the Notice of Intent (NOI) for Reynolds to conduct exploration activities on our West Oatman project in Mohave County, Arizona. All proposed exploration work will occur within the Bureau's Kingman Resource Area.

Reynolds requests that the information contained in the enclosed NOI be kept confidential. If you have any questions, or require any additional information, please do not hesitate to call me or Ray Irwin, Regional Exploration Manager for Reynolds, at (702) 829-8018. I will be the project geologist for the West Oatman project.

Sincerely,

Michael R. Winston  
Geologist

Reynolds Metals Exploration, Inc.

MINING NOTICE

Item numbers 1 through 6 below are provided in conformance with 43 CFR 3809.1-3(c).

1. Name of Claimant: Sun River Gold, Inc.  
12761 16th Ave., Suite 110  
White Rock, B.C., Canada V4A 1N2  
(604) 538-6601
2. Name of Operator: Reynolds Metals Exploration, Inc.  
5301 Longley Lane, Suite 157  
Reno, NV 89511  
(702) 829-8018
3. Claim Information:
  - A. All claims are unpatented federal lode mining claims
  - B. The subject claims are located within the following lands:  
Sec. 19, Township 20 North, Range 20 West, G&SRM  
Sec. 24, Township 20 North, Range 21 West, G&SRM
  - C. 

<u>Claim Names</u>	<u>BLM AMC Number</u>
FB 1A-25A	256158-256182
FB 1A-25A (Amended)	256158-256182
4. Proposed Activities:

The Reynolds Metals Exploration, Inc. (Reynolds) FB claims are part of our West Oatman project and includes most of the north 1/2 of Sec. 19, T20N, R20W and a fraction of the NE 1/4 of Sec. 24, T20N, R21W, Mohave County, Arizona. (See Figures 1 & 2). Access to the area is via the Mohave County maintained Silver Creek road, approximately 7 miles southeast of Bullhead City thence veer left, parallel to Silver Creek for 1 mile, then turn left (north) for 1 mile towards the Moss mine on a 4x4 road which continues northwest and dead-ends near the NW 1/4 of Sec. 19.

The FB claims have been explored by several shallow shafts, adits and prospect pits. Most are accessible by 4x4 roads although the

only recent activity has been by weekend off-road enthusiasts. Figure 2 shows the FB claim boundary and primary existing roads. Proposed drill site locations are shown as red dots with proposed new 4x4 roads shown in orange. Only about 1600 feet of new roads will be required to reach the three proposed drill sites. Minor repair of the existing roads will be required, especially in steep arroyo crossings to enable passage of the drill rig whether it be track-mounted or truck-mounted.

Reynolds plans to drill up to 3 reverse circulation exploration holes from 3 different sites as shown in Figure 2. The hole depth will range from 300 to 700 feet in angled holes approximately 5 1/2" in diameter. A track-mounted rig of TH-100 class or equivalent is planned.

Construction and improvement of access will not involve cuts of more than 3 feet on the inside edge and roads constructed will be 12 feet wide. All earthwork will be constructed with a bulldozer of D-7 class or equivalent. Surface disturbance at each of the drill sites may be as much as 20 feet by 40 feet. Total surface disturbance under this Notice (up to 3 drill sites and 1600 feet of new roads) will be less than 1.0 acre.

5. Start-up Date:

Reynolds desires to commence the proposed activities on or after April 22, 1992 continuing intermittently with completion of the proposed activities within approximately two months of the actual start-up date, but no later than December 31, 1992.

6. Reclamation Process:

Reclamation of all areas disturbed by Reynolds under this Notice of Intent will be completed to the standards described in 43 CFR 3809.1-3(d). To prevent unnecessary or undue degradation of federal lands during the planned operations, Reynolds will recontour, to the extent possible, all drill sites and any new access roads constructed under this NOI. Reynolds will also implement revegetation activities in areas disturbed during the proposed operations. Revegetation activities will consist of broadcasting a mixture of indigenous plant seeds, approved by the BLM authorized officer, over the areas of surface disturbance.

I will complete reclamation of all disturbed sites during my operations in accordance with 43 CFR 3809.1-3(d) and all reasonable measures will be taken to prevent unnecessary or undue degradation of the Federal lands during operations.
